Course Name: Logic			
System : Yearly	Units No :4	Hours No :2	Stage :second

Vocabulary

Introduction: The definition of logic, the importance of logic and the need for it
Definition of science, the relationship of logic to the stages of human learning
Perception and ratification, sections of ratification, ignorance and its sections
Science is necessary and theoretical, research the science of logic
The meanings of the semantics and their sections
Verbal significance: definition, division, division of words
Tandem and contrast, division of different words, division of correspondence
Singular and compound, singular sections
Macro and micro, macro macro, accomplice, skeptic
The concept and credibility of the title and title
The four ratios
Proportion between extremes
The five colleges: (type, gender, class, special, overview)
Other subdivisions: (real and additional type) gender near and far
Pregnancy and its types: Incidental, logical, natural and mental
Identifier: Introduction to its definition and definition
Sections of definition: full limit, minus, full and incomplete
Definition of the example, the inductive method, the definition of the analogy, the conditions of definition
Divide: Introduction to the statement of division assets, division of divisions, basis of division
Division types, division methods
Definition of division, gain definition of division
The method of mental analysis, such as binary logic division
Issues and provisions, case definition, case sections
Parts of the case, sections of the case as a subject, the fence and its terms
The division of conditional : (conditional neglected and restricted), the fence in the condition , the division of the women
The resulting and alerted, routers
General possibility and potential, case hand, and types of routers
The Special Conditional Compulsory Compartmental Parts of the Existential Being
Other condition divisions and separate divisions
In the provisions of the cases and the ratios between them, the contradiction and its conditions, the difference, the overlap, the antagonism and the entry into contradiction
