TEMPLATE FOR PROGRAMME SPECIFICATION

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

PROGRAMME SPECIFICATION

This Programme Specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It is supported by a specification for each course that contributes to the programme.

1. Teaching Institution	University of Anbar
2. University Department/Centre	Plant Protection
3. Programme Title	Agriculture Vocabulary
4. Title of Final Award	Bachelor of Agriculture
5. Modes of Attendance offered	other
6. Accreditation	Study plan for the fourth stage
7. Other external influences	Related laws and guidelines
8. Date of production/revision of	1/6/2020
this specification	

9. Aims of the Programme

Providing students with knowledge of the nature and methods of diagnosing agricultural pests and combating them from an academic and professional point of view

Understand the nature of agricultural pests and their livelihood according to scientific standards

Understand the nature of direct and indirect economic damages caused by agricultural pests and how to deal with them according to correct applied scientific methods

Provide students with information on how to manage IPM programs of pests

Develop their awareness regarding dealing with chemical pesticides and how to dispose of their residues

Training students based on the summer training system in the supportive competent authorities, such as the agricultural divisions and the agricultural quarantine

10. Learning Outcomes, Teaching, Learning and Assessment Methods

- A. Knowledge and Understanding
- 1- Understand the concept of pest
- 2- Distinguish between a primary lesion and a secondary lesion
- 3- Distinguishing between types of insect, fungal, bacterial, viral and other pests.
- 4- Knowing the level of damage to the pest and when the control order is required
- 5- Knowing the appropriate type of pesticide or pest control and knowing the appropriate timing for the control
- 6-Identification of pesticides and their families and how to deal with them
- 7- Full knowledge of agricultural pest management.
 - B. Subject-specific skills
- B1 Knowing how to diagnose the pest
- B 2 Knowing how to determine the level of damage and the type as well as appropriate method and time of control.
 - B3 Knowing how to manage the integrated crop

Teaching and Learning Methods

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture with the participation of all students in the section with the professor to give the material as a kind of interaction.
- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

Assessment Methods

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about such study.
- 4- Evaluation through periodic monthly exams.
- C. Thinking Skills
- C1- Instilling values and principles in the student by emphasizing the independence of the statistician when expressing his impartial opinion
- C2- Emphasis on personal characteristics such as integrity, honesty, confidentiality and morals.
- C3 Statement of the importance of the rules of professional conduct and its exposure to legal penalties in case of violation
- C4- Emphasizing the importance of combating financial and administrative corruption by the regulatory bodies.

Teaching and Learning Methods

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the Directorates of Agriculture, Silos and Agricultural Quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

- D. General and Transferable Skills (other skills relevant to employability and personal development)

- D1- Determine the type of pest
 D2- Determining the level of economic damage
 D 3- Determining the type, method and timing of the control
- D4- Integrated pest management

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

13. Personal Development Planning

Encouraging students to achieve the highest grades during the study stages in the college, so that they can be the first in order to achieve their dreams by completing their studies in postgraduate studies and encouraging them to enroll in postgraduate studies.

14. Admission criteria.

The average of the student in the high school, taking into account the desire of the student

15. Key sources of information about the programme

Methodological books (books, magazines, periodicals, and websites) specialized in the field of plant protection

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

PROGRAMME SPECIFICATION

This Programme Specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It is supported by a specification for each course that contributes to the programme.

1. Teaching Institution	University of Anbar
2. University Department/Centre	Plant Protection
3. Programme Title	Agriculture Vocabulary
4. Title of Final Award	Bachelor of Agriculture
5. Modes of Attendance offered	other
6. Accreditation	Study plan for the fourth stage
7. Other external influences	Related laws and guidelines
8. Date of production/revision of	18/9/2021
this specification	

9. Aims of the Programme

Providing students with knowledge of the nature and methods of diagnosing agricultural pests and combating them from an academic and professional point of view

Understand the nature of agricultural pests and their livelihood according to scientific standards

Understand the nature of direct and indirect economic damage caused by agricultural pests and how to deal with them according to correct applied scientific methods

Provide students with information on how to manage IPM programs of pests

Develop their awareness regarding dealing with chemical pesticides and how to dispose of their residues

10. Learning Outcomes, Teaching, Learning and Assessment Methods

- A. Knowledge and Understanding
- 1- Understand the concept of pest
- 2- Distinguish between a primary lesion and a secondary lesion
- 3- Distinguishing between types of insect, fungal, bacterial, viral and other pests.
- 4- Knowing the level of damage to the pest and when the control order is required
- 5- Knowing the appropriate type of pesticide or pest control and knowing the appropriate timing for the control
- 6-Identification of pesticides and their families and how to deal with them
- 7- Full knowledge of agricultural pest management.
 - B. Subject-specific skills
 - B1 Knowing how to diagnose the pest
 - B 2 Knowing how to determine the level of damage and the type and method of appropriate control and at the appropriate time
 - B3 Knowing how to manage the integrated crop

Teaching and Learning Methods

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.
 - C. Thinking Skills
 - C1- Instilling values and principles in the student by emphasizing the independence of the statistician when expressing his impartial opinion
 - C2- Emphasis on personal characteristics such as integrity, honesty, confidentiality and morals.
 - C3 Statement of the importance of the rules of professional conduct and its exposure to legal penalties in case of violation
 - C4- Emphasizing the importance of combating financial and administrative corruption by the regulatory bodies.

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

- D. General and Transferable Skills (other skills relevant to employability and personal development)

 - D1- Determine the type of pest
 D2- Determining the level of economic damage
 D 3- Determining the type, method and timing of the control
 - D4- Integrated pest management

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

TEMPLATE FOR COURSE SPECIFICATION

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

COURSE SPECIFICATION

1 Teaching Institution

This Course Specification provides a concise summary of the main features of the course and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the programme specification.

University of Anbar

1. Teaching Institution	
2. University Department/Centre	Plant Protection
3. Course title/code	Insect ecology \ APP3405
4. Programme(s) to which it contributes	Lectures
5. Modes of Attendance offered	attendance
6. Semester/Year	first trimester / forth stage
7. Number of hours tuition (total)	75
8. Date of production/revision of this Specification	2021/9/18
9. Aims of the Course	
The course aims at introducing the studer ecology in order to identify the seasons o based on knowledge of weather factors su of light, wind and rain on the life behavior	f insect activity to reduce their damage, uch as heat and humidity, as well as the effect

- 10. Learning Outcomes, Teaching ,Learning and Assessment Methode
 - A- Knowledge and Understanding
 - A1- Understand insect ecology
 - A2- Study the history of environmental science
 - A 3- Understand the ecology of plants and animals.
 - A4- Understand the environmental determinants of insect growth and reproduction
 - A5- Understand the effect of food quality on insect reproduction and productivity
 - A6- Full knowledge of agricultural pest management.
 - C. Subject-specific skills
 - B1 Knowing how to identify suitable environments for the spread and activity of insects
 - B2 Knowing how to determine the level of damage and the type and method of appropriate control at the appropriate time
 - B3 Knowledge of integrated management to obtain an appropriate control process for the insect pest.

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture,

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.
 - D. Thinking Skills
 - C 1- Instilling values and principles in the student by emphasizing the independence of the statistician when expressing his impartial opinion
 - C 2 Emphasis on personal characteristics such as integrity, honesty, confidentiality and morals.
 - C3 Statement of the importance of the rules of professional conduct and its exposure to legal penalties in case of violation
 - C4- Emphasizing the importance of combating financial and administrative corruption by regulatory agencies.

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

D. General and Transferable Skills (other skills relevant to employability and personal development)
D1- The ability to determine the appropriate insect environment for a particular

insect species

D2- The ability to determine the level of economic damage to insect pests D 3- The ability to determine the type, method and timing of the control

D 4- The ability to harness physical factors to control a specific insect

<i></i>	_1	1

11. Course Structure					
Week	Hours	ILOs	Unit/Module or Topic Title	Teaching Method	Assessment Method
1	5	Knowledge of insect ecology	Ecology History and studies of ecology Plant Ecology Animal Ecology Specialized Environmental Studies Environment Physical environment Biotic environment Environmental classification Community Units Links between members of the same type	Lecture	quiz
2	5	Know the environmental factors that determine the growth and reproduction of insects		Lecture	quiz
3	5	*** The deadly effect of low temperatures	***Deadly effect for low temperatures *** Deadly effect for freezing ***Deadly effect of high temperatures Moisture or Relative humidity Precipitation moisture The significant negative effects of relative humidity are beyond the tolerance limits	Lecture	quiz

4	5	Know the effect of some physical factors	*Effect of heat and humidity together Atmospheric gases light Effect of light on insect activity **Effect of light on the silence of insects **Effect of light intensity on insect movement **Effect of light on laying eggs in insects **Effect of light on growth in insects ** Effect of light in general	Lecture	quiz
5	5	Know the effect of wind and fire on the insect community		Lecture	quiz
6	5	Know the effect of atmospheric pressure, gravity and location on insect activity	Atmospheric pressure Earth Gravity Microclimate Second: Place *the soil *Breeding insects and multiple places Third: Food Fourth: Other living organisms	Lecture	quiz
7	5	Identify the effect of food on the behavior and livelihood of insects		Lecture	quiz
8	5	To know the effect of the type of food on the life of insects	Effects of food quality on insects *Effect of food quality to	Lecture	quiz
9	5	Learn about productivity in insects and their levels	Productivity Levels Productivity Dispersal Dispersal Forms Mechanical of Dispersal Causes of Dispersal	Lecture	quiz

10	5	effect of spreading on the population of insects and its forms	Effect of insect spread on its numbers and environment *Effect of Emigration on the Emigrants and its environment Effect of Imigration on the Imigrants and its environment Effect of Trans- migration on the Trans migrants and its environment Examples of migratory insects	Lecture	quiz
11	5	Know the types of distribution in insects	Distribution distribution Random Uniform distribution Clumped distribution Aggregation	Lecture	quiz
12	5		Natural selection and natural balance Natural Selection Causes of natural selection Sexual Selection	Lecture	quiz
13	5	natural balance	Natural Balance Factors that have helped insects resist and tolerate different environmental conditions *Fast mobility *Adaptability	Lecture	quiz
14	5	theories of dormancy in		Lecture	quiz
15	5	Identify the structure of insects and their impact on survival	* Exoskeleton *Small Size *Metamorphosis *High Fecundity Factors affecting the vitality and reproduction of insects	Lecture	quiz

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

PROGRAMME SPECIFICATION

This Programme Specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It is supported by a specification for each course that contributes to the programme.

1. Teaching Institution	University of Anbar
2. University Department/Centre	Plant Protection
3. Programme Title	Agriculture Vocabulary
4. Title of Final Award	Bachelor of Agriculture
5. Modes of Attendance offered	other
6. Accreditation	Study plan for the third stage
7. Other external influences	Related laws and guidelines
8. Date of production/revision of	9 / 20/2021
this specification	

9. Aims of the Programme

Providing students with knowledge of the nature and methods of diagnosing agricultural pests and combating them from an academic and professional point of view

Understand the nature of agricultural fungi and their livelihood according to scientific standards

Understand the nature of direct and indirect economic damage caused by agricultural fungi and how to deal with them according to correct applied scientific methods

Provide students with information on how to programs of fungi

Develop their awareness regarding dealing with chemical pesticides and how to dispose of their residues

10. Learning Outcomes, Teaching, Learning and Assessment Methods

- A. Knowledge and Understanding
- 1- Understand the concept of fungi
- 2- Distinguish between a primary lesion and a secondary lesion
- 3- Distinguishing between types of, fungal,
- 4- Knowing the level of damage to the plant diseas and when the control order is required
- 5- Knowing the appropriate type of pesticide or plant diseas pest control and knowing the appropriate timing for the control
- 6-Identification of pesticides and their families and how to deal with them
- 7- Full knowledge of agricultural plant diseas
- B. Subject-specific skills
- B1 Knowing how to diagnose the plant diseas
- B 2 Knowing how to determine the level of damage and the type and method of appropriate control and at the appropriate time
- B3 Knowing how to manage the integrated crop

Teaching and Learning Methods

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.
 - C. Thinking Skills
 - C1- Instilling values and principles in the student by emphasizing the independence of the statistician when expressing his impartial opinion
 - C2- Emphasis on personal characteristics such as integrity, honesty, confidentiality and morals.
 - C3 Statement of the importance of the rules of professional conduct and its exposure to legal penalties in case of violation
 - C4- Emphasizing the importance of combating financial and administrative corruption by the regulatory bodies.

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

- D. General and Transferable Skills (other skills relevant to employability and personal development)

 - D1- Determine the type of pest
 D2- Determining the level of economic damage
 D 3- Determining the type, method and timing of the control
 - D4- Integrated pest management

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis

13. Personal Development Planning

Encouraging students to achieve the highest grades in the study stages in the college so that they can be the first in order to achieve their dreams future students from completing their studies in postgraduate studies and encouraging them to enroll in postgraduate studies.

14. Admission criteria.

The average of the student in the high school, taking into account the desire of the student

15. Key sources of information about the programme

Methodological books (books, magazines, periodicals, and websites) specialized in the field of plant protection

TEMPLATE FOR COURSE SPECIFICATION

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

COURSE SPECIFICATION

This Course Specification provides a concise summary of the main features of the course and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the programme specification.

1. Teaching Institution	University of Anbar
2. University Department/Centre	Plant Protection
3. Course title/code	mycology / APP3304
4. Programme(s) to which it contributes	Contributes to the knowledge of plant fungi
5. Modes of Attendance offered	attendance
6. Semester/Year	first trimester third stage
7. Number of hours tuition (total)	70
8. Date of production/revision of this Specification	9/20/2021
9. Aims of the Course	
The course aims to teach students what fudamages to agricultural crops	angi, and their direct and indirect economic
What are the symptoms of infection and I diseas scientific and correct ways and at t	now to diagnose and combat it in the plant the lowest costs.

- 10. Learning Outcomes, Teaching ,Learning and Assessment Methode
 - A- Knowledge and Understanding of plant diseas
 - B- Understand the concept of plant diseas
 - A2- Distinguish between the types of plant diseas A 3- Knowing how to diagnose the plant diseas
 - A4 Full knowledge of plant diseas

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

Assessment methods

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.
 - C. Thinking Skills
 - C 1- Instilling values and principles in the student by emphasizing the independence of the statistician when expressing his impartial opinion
 - C 2 Emphasis on personal characteristics such as integrity, honesty, confidentiality and morals.
 - C3 Statement of the importance of the rules of professional conduct and its exposure to legal penalties in case of violation
 - C4- Emphasizing the importance of combating financial and administrative corruption by regulatory agencies.

Teaching and Learning Methods

- D 1- The ability to determine the type Full knowledge of plant diseas
- D 2- The ability to determine the level of economic damage
- D 3- The ability to determine the type, method and timing of the control
- D 4- The ability to integrated management of plant diseas

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

- D. General and Transferable Skills (other skills relevant to employability and personal development)
 D 1- The ability to determine the type of plant diseas management
 D 2- The ability to determine the level of economic damage
 D 3- The ability to determine the type, method and timing of the control

 - D 4- The ability to integrated plant diseas

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

PROGRAMME SPECIFICATION

This Programme Specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It is supported by a specification for each course that contributes to the programme.

1. Teaching Institution	University of Anbar
2. University Department/Centre	Plant Protection
3. Programme Title	Agriculture Vocabulary
4. Title of Final Award	Bachelor of Agriculture
5. Modes of Attendance offered	other
6. Accreditation	Study plan for the fourth stage
7. Other external influences	Related laws and guidelines
8. Date of production/revision of	20/92021
this specification	

9. Aims of the Programme

Providing students with knowledge of the nature and methods of diagnosing agricultural pests and combating them from an academic and professional point of view

Understand the nature of agricultural plant diseas and their livelihood according to scientific standards

Understand the nature of direct and indirect economic damage caused by agricultural pests and how to deal with them according to correct applied scientific methods

Provide students with information on how to manage IPM programs of pests

Develop their awareness regarding dealing with chemical pesticides and how to dispose of their residues

10. Learning Outcomes, Teaching, Learning and Assessment Methods

- A. Knowledge and Understanding
- 1- Understand the concept of plant diseas
- 2- Distinguish between a primary lesion and a secondary lesion
- 3- Distinguishing between types of plant diseas, fungal, bacterial, viral and other pests.
- 4- Knowing the level of damage to the plant diseas and when the control order is required
- 5- Knowing the appropriate type of pesticide or plant diseas pest control and knowing the appropriate timing for the control
- 6-Identification of pesticides and their families and how to deal with them
- 7- Full knowledge of agricultural plant diseas pest management.
- B. Subject-specific skills
- B1 Knowing how to diagnose the plant diseas
- B 2 Knowing how to determine the level of damage and the type and method of appropriate control and at the appropriate time
- B3 Knowing how to manage the integrated crop

Teaching and Learning Methods

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.
 - C. Thinking Skills
 - C1- Instilling values and principles in the student by emphasizing the independence of the statistician when expressing his impartial opinion
 - C2- Emphasis on personal characteristics such as integrity, honesty, confidentiality and morals.
 - C3 Statement of the importance of the rules of professional conduct and its exposure to legal penalties in case of violation
 - C4- Emphasizing the importance of combating financial and administrative

corruption by the regulatory bodies.

Teaching and Learning Methods

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

- D. General and Transferable Skills (other skills relevant to employability and personal development)

 - D1- Determine the type of pest
 D2- Determining the level of economic damage
 D 3- Determining the type, method and timing of the control
 - D4- Integrated pest management

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

13. Personal Development Planning

Encouraging students to achieve the highest grades in the study stages in the college so that they can be the first in order to achieve their dreams future students from completing their studies in postgraduate studies and encouraging them to enroll in postgraduate studies.

14. Admission criteria.

The average of the student in the high school, taking into account the desire of the student

15. Key sources of information about the programme

Methodological books (books, magazines, periodicals, and websites) specialized in the field of plant protection

TEMPLATE FOR COURSE SPECIFICATION

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

COURSE SPECIFICATION

This Course Specification provides a concise summary of the main features of the course and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the programme specification.

1. Teaching Institution	University of Anbar
2. University Department/Centre	Plant Protection
3. Course title/code	Plant pathology / APP3308
4. Programme(s) to which it contributes	Contributes to the knowledge of plant diseas
5. Modes of Attendance offered	attendance
6. Semester/Year	second trimester third stage
7. Number of hours tuition (total)	70
8. Date of production/revision of this Specification	9/20/2021
9. Aims of the Course	
The course aims to teach students what p economic damages to agricultural crops	plant diseas, and their direct and indirect
What are the symptoms of infection and	how to diagnose and combat it in the plant
diseas scientific and correct ways and at	the lowest costs.

- 10. Learning Outcomes, Teaching ,Learning and Assessment Methode
 - A- Knowledge and Understanding of plant diseas
 - B- Understand the concept of plant diseas
 - A2- Distinguish between the types of plant diseas A 3- Knowing how to diagnose the plant diseas
 - A4 Full knowledge of plant diseas

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

Assessment methods

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.
 - C. Thinking Skills
 - C 1- Instilling values and principles in the student by emphasizing the independence of the statistician when expressing his impartial opinion
 - C 2 Emphasis on personal characteristics such as integrity, honesty, confidentiality and morals.
 - C3 Statement of the importance of the rules of professional conduct and its exposure to legal penalties in case of violation
 - C4- Emphasizing the importance of combating financial and administrative corruption by regulatory agencies.

Teaching and Learning Methods

- D 1- The ability to determine the type Full knowledge of plant diseas
- D 2- The ability to determine the level of economic damage
- D 3- The ability to determine the type, method and timing of the control
- D 4- The ability to integrated management of plant diseas

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

- D. General and Transferable Skills (other skills relevant to employability and personal development)
 D 1- The ability to determine the type of plant diseas management
 D 2- The ability to determine the level of economic damage
 D 3- The ability to determine the type, method and timing of the control

 - D 4- The ability to integrated plant diseas

TEMPLATE FOR COURSE SPECIFICATION

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

COURSE SPECIFICATION

This Course Specification provides a concise summary of the main features of the course and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided..

1. Teaching Institution	University of Anbar
2. University Department/Centre	Plant Protection
3. Course title/code	
4. Programme(s) to which it contributes	Contributes to the knowledge of Principles of Plant Protection
5. Modes of Attendance offered	
6. Semester/Year	First & second trimester / First & second stage 2020 - 2021
7. Number of hours tuition (total)	72 houres
8. Date of production/revision of this Specification	20/9/2021
9. Aims of the Course	

The subjects of this course (Principles of P. Prot.) briefly covers describing agricultural pests, their types, the economic risks they cause, their impact on agricultural production and ways to reduce their damage.

10. Learning Outcomes, Teaching ,Learning and Assessment Methode

- A- Knowledge and Understanding
 - 1- Understand the concept of pest
 - 2- Distinguish between a primary lesion and a secondary lesion
 - 3- Distinguishing between types of insect, fungal, bacterial, viral and other pests.
 - 4- Knowing the level of damage to the pest and when the control order is required
 - B. Subject-specific skills
 - B1 Knowing how to diagnose the pest.
 - B 2 Knowing how to determine the level of damage and the type and method of appropriate control and at the appropriate time.

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture With the participation of all students in the section with the professor to give the material as a kind of interaction.
- 3- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.

TEMPLATE FOR PROGRAMME SPECIFICATION

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

PROGRAMME SPECIFICATION

This Programme Specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It is supported by a specification for each course that contributes to the programme.

1. Teaching Institution	University of Anbar
2. University Department/Centre	Plant Protection
3. Programme Title	Agriculture Vocabulary
4. Title of Final Award	Bachelor of Agriculture
5. Modes of Attendance offered	other
6. Accreditation	Study plan for the second stage
7. Other external influences	Related laws and guidelines
8. Date of production/revision of	1/6/2021
this specification	

9. Aims of the Programme

students with knowledge of the nature and methods of insect pests for stored materials and their academic and professional control

Understand the nature of agricultural pests and their survival according to scientific standards

Understand the nature of direct and indirect storage damages caused by agricultural pests and how to deal with them in the field according to correct practical application methods

Provide students with information on stockpile pest management and control

Develop their awarenessof about dealing with chemical pesticides and how to get rid of the residue

10. Learning Outcomes, Teaching, Learning and Assessment Methods

- A. Knowledge and Understanding
- 1- Understand the concept of pest
- 2- Distinguish between a primary lesion and a secondary lesion
- 3- Distinguishing between types of insect, fungal, bacterial, viral and other pests.
- 4- Knowing the level of damage to the pest and when the control order is required
- 5- Knowing the appropriate type of pesticide or pest control and knowing the appropriate timing for the control
- 6-Identification of pesticides and their families and how to deal with them
- 7- Full knowledge of agricultural pest management.
 - B. Subject-specific skills
- B1 Knowing how to diagnose the pest
- B 2 Knowing how to determine the level of damage and the type and method of appropriate control and at the appropriate time
- B3 Knowing how to manage the integrated crop

Teaching and Learning Methods

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.
 - C. Thinking Skills
 - C1- Instilling values and principles in the student by emphasizing the independence of the statistician when expressing his impartial opinion
 - C2- Emphasis on personal characteristics such as integrity, honesty, confidentiality and morals.
 - C3 Statement of the importance of the rules of professional conduct and its exposure to legal penalties in case of violation
 - C4- Emphasizing the importance of combating financial and administrative corruption by the regulatory bodies.

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

- D. General and Transferable Skills (other skills relevant to employability and personal development)

 - D1- Determine the type of pest
 D2- Determining the level of economic damage
 D 3- Determining the type, method and timing of the control
 - D4- Integrated pest management

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

13. Personal Development Planning

Encouraging students to achieve the highest grades in the study stages in the college so that they can be the first in order to achieve their dreams future students from completing their studies in postgraduate studies and encouraging them to enroll in postgraduate studies.

14. Admission criteria.

The average of the student in the high school, taking into account the desire of the student

15. Key sources of information about the programme

Methodological books (books, magazines, periodicals, and websites) specialized in the field of plant protection

TEMPLATE FOR COURSE SPECIFICATION

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

COURSE SPECIFICATION

This Course Specification provides a concise summary of the main features of the course and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the programme specification.

1. Teaching Institution	University of Anbar
2. University Department/Centre	Plant Protection
3. Course title/code	Stores/APP3403
4. Programme(s) to which it contributes	Contributes to the knowledge of Biological control
5. Modes of Attendance offered	lectur
6. Semester/Year	First/second
7. Number of hours tuition (total)	75
8. Date of production/revision of this Specification	2021/6/1
9. Aims of the Course	
The goal is to teach students about storag and store and its products and how to dis	ge pests that infect grain stored in the field pose of them through control

- 10. Learning Outcomes, Teaching ,Learning and Assessment Methode
 - A- Knowledge and Understanding of Integrated pest managment
 - B- Understand the concept of Integrated pest managment
 - A2- Distinguish between the types of Integrated pest managment
 - A 3- Knowing how to diagnose the pest
 - A4 Full knowledge of pests management

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

Assessment methods

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.
 - C. Thinking Skills
 - C 1- Instilling values and principles in the student by emphasizing the independence of the statistician when expressing his impartial opinion
 - C 2 Emphasis on personal characteristics such as integrity, honesty, confidentiality and morals.
 - C3 Statement of the importance of the rules of professional conduct and its exposure to legal penalties in case of violation
 - C4- Emphasizing the importance of combating financial and administrative corruption by regulatory agencies.

Teaching and Learning Methods

- D 1- The ability to determine the type Full knowledge of pests management
- D 2- The ability to determine the level of economic damage
- D 3- The ability to determine the type, method and timing of the control
- D 4- The ability to integrated management of nematode diseases

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

lesson

- D. General and Transferable Skills (other skills relevant to employability and personal development)

 D 1- The ability to determine the type of integrated management
 D 2- The ability to determine the level of economic damage
 D 3- The ability to determine the type, method and timing of the control

 - D 4- The ability to integrated management of pests

control of stored

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

PROGRAMME SPECIFICATION

This Programme Specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It is supported by a specification for each course that contributes to the programme.

1. Teaching Institution	University of Anbar
2. University Department/Centre	Plant Protection
3. Programme Title	Agriculture Vocabulary
4. Title of Final Award	Bachelor of Agriculture
5. Modes of Attendance offered	other
6. Accreditation	Study plan for the fourth stage
7. Other external influences	Related laws and guidelines
8. Date of production/revision of	1/6/2021
this specification	

9. Aims of the Programme

Providing students with knowledge of the nature and methods of diagnosing agricultural pests and combating them from an academic and professional point of view

Understand the nature of agricultural pests and their livelihood according to scientific standards

Understand the nature of direct and indirect economic damage caused by agricultural pests and how to deal with them according to correct applied scientific methods

Provide students with information on how to manage IPM programs of pests

Develop their awareness regarding dealing with chemical pesticides and how to dispose of their residues

10. Learning Outcomes, Teaching, Learning and Assessment Methods

- A. Knowledge and Understanding
- 1- Understand the concept of pest
- 2- Distinguish between a primary lesion and a secondary lesion
- 3- Distinguishing between types of insect, fungal, bacterial, viral and other pests.
- 4- Knowing the level of damage to the pest and when the control order is required
- 5- Knowing the appropriate type of pesticide or pest control and knowing the appropriate timing for the control
- 6-Identification of pesticides and their families and how to deal with them
- 7- Full knowledge of agricultural pest management.
 - B. Subject-specific skills
 - B1 Knowing how to diagnose the pest
 - B 2 Knowing how to determine the level of damage and the type and method of appropriate control and at the appropriate time
 - B3 Knowing how to manage the integrated crop

Teaching and Learning Methods

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.
 - C. Thinking Skills
 - C1- Instilling values and principles in the student by emphasizing the independence of the statistician when expressing his impartial opinion
 - C2- Emphasis on personal characteristics such as integrity, honesty, confidentiality and morals.
 - C3 Statement of the importance of the rules of professional conduct and its exposure to legal penalties in case of violation
 - C4- Emphasizing the importance of combating financial and administrative corruption by the regulatory bodies.

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

- D. General and Transferable Skills (other skills relevant to employability and personal development)

 - D1- Determine the type of pest
 D2- Determining the level of economic damage
 D 3- Determining the type, method and timing of the control
 - D4- Integrated pest management

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

TEMPLATE FOR COURSE SPECIFICATION

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

COURSE SPECIFICATION

This Course Specification provides a concise summary of the main features of the course and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the programme specification.

1. Teaching Institution	University of Anbar
2. University Department/Centre	Plant Protection
3. Course title/code	Field crops diseases \ APP3401
4. Programme(s) to which it contributes	Contributes to the knowledge Field crops diseases
5. Modes of Attendance offered	attendance
6. Semester/Year	first trimester / fuoth stage
7. Number of hours tuition (total)	75
8. Date of production/revision of this Specification	1\6\2021
9. Aims of the Course	
	iportant diseases affecting field crops such as me, safflower, sunflower, flax, cotton, beans,
ana ana ana wacco.	
Introducing the most important methods	of control of these diseases
•	

- 10. Learning Outcomes, Teaching ,Learning and Assessment Methode
 - A- Knowledge and Understanding
 - B- A1- The concept of plant disease
 - C- A2- The most important losses caused by plant diseases
 - D- A3- Studying the most important pathogens (fungal, bacterial, viral and nematode).
 - E- A4- Knowing the most important diseases that affect different cereal crops
 - F- A 5- Knowing the most important diseases that affect oil crops
 - G- A6- Knowing the most important diseases that affect fiber crops
 - H- A 7- Identify the most important diseases that affect forage crops
 - I- A8- Finding the best means to combat these diseases

C. Subject-specific skills

- J- B1 Knowing how to diagnose diseases
- K-B2 Knowing how to determine the level of damage, the type and method of appropriate control and the appropriate timing
- L- B3 Knowing how to manage the integrated crop

Teaching and Learning Methods

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.
 - D. Thinking Skills
 - C 1- Instilling values and principles in the student by emphasizing the independence of the statistician when expressing his impartial opinion
 - C 2 Emphasis on personal characteristics such as integrity, honesty, confidentiality and morals.
 - C3 Statement of the importance of the rules of professional conduct and its exposure to legal penalties in case of violation

REPORT OF THE PROPERTY OF THE

C4- Emphasizing the importance of combating financial and administrative corruption by regulatory agencies.

Teaching and Learning Methods

- D 1- The ability to determine the type of plant disease
- D 2- The ability to determine the type of pathogen
- D 3- The ability to determine the type, method and timing of the control

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

- D. General and Transferable Skills (other skills relevant to employability and personal development)
 - D 1- The ability to determine the type of plant disease
 - D 2- The ability to determine the type of pathogen
 - D 3- The ability to determine the type, method and timing of the control

TEMPLATE FOR PROGRAMME SPECIFICATION

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

PROGRAMME SPECIFICATION

This Programme Specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It is supported by a specification for each course that contributes to the programme.

1. Teaching Institution	University of Anbar
2. University Department/Centre	Plant Protection
3. Programme Title	Agriculture Vocabulary
4. Title of Final Award	Bachelor of Agriculture
5. Modes of Attendance offered	other
6. Accreditation	Study plan for the fourth stage
7. Other external influences	Related laws and guidelines
8. Date of production/revision of	1/6/2021
this specification	

9. Aims of the Programme

Providing students with knowledge of the nature and methods of diagnosing agricultural pests and combating them from an academic and professional point of view

Understand the nature of agricultural pests and their livelihood according to scientific standards

Understand the nature of direct and indirect economic damage caused by agricultural pests and how to deal with them according to correct applied scientific methods

Provide students with information on how to manage IPM programs of pests

Develop their awareness regarding dealing with chemical pesticides and how to dispose of their residues

10. Learning Outcomes, Teaching, Learning and Assessment Methods

- A. Knowledge and Understanding
- 1- Understand the concept of pest
- 2- Distinguish between a primary lesion and a secondary lesion
- 3- Distinguishing between types of insect, fungal, bacterial, viral and other pests.
- 4- Knowing the level of damage to the pest and when the control order is required
- 5- Knowing the appropriate type of pesticide or pest control and knowing the appropriate timing for the control
- 6-Identification of pesticides and their families and how to deal with them
- 7- Full knowledge of agricultural pest management.
 - B. Subject-specific skills
 - B1 Knowing how to diagnose the pest
 - B 2 Knowing how to determine the level of damage and the type and method of appropriate control and at the appropriate time
 - B3 Knowing how to manage the integrated crop

Teaching and Learning Methods

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.
 - C. Thinking Skills
 - C1- Instilling values and principles in the student by emphasizing the independence of the statistician when expressing his impartial opinion
 - C2- Emphasis on personal characteristics such as integrity, honesty, confidentiality and morals.
 - C3 Statement of the importance of the rules of professional conduct and its exposure to legal penalties in case of violation
 - C4- Emphasizing the importance of combating financial and administrative corruption by the regulatory bodies.

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

- D. General and Transferable Skills (other skills relevant to employability and personal development)

 - D1- Determine the type of pest
 D2- Determining the level of economic damage
 D 3- Determining the type, method and timing of the control
 - D4- Integrated pest management

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

TEMPLATE FOR COURSE SPECIFICATION

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

COURSE SPECIFICATION

This Course Specification provides a concise summary of the main features of the course and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the programme specification.

1. Teaching Institution	University of Anbar
2. University Department/Centre	Plant Protection
3. Course title/code	Field crops diseases \ APP3401
4. Programme(s) to which it contributes	Contributes to the knowledge Field crops diseases
5. Modes of Attendance offered	attendance
6. Semester/Year	first trimester / fuoth stage
7. Number of hours tuition (total)	75
8. Date of production/revision of this Specification	1\6\2021
9. Aims of the Course	
The course aims to introduce the most im	aportant diseases affecting field crops such as
wheat, barley, corn maize, sorghum, sesa	me, safflower, sunflower, flax, cotton, beans,
alfa alfa and tobacco.	
Introducing the most important methods	of control of these diseases

- 10. Learning Outcomes, Teaching ,Learning and Assessment Methode
 - A- Knowledge and Understanding
 - B- A1- The concept of plant disease
 - C- A2- The most important losses caused by plant diseases
 - D- A3- Studying the most important pathogens (fungal, bacterial, viral and nematode).
 - E- A4- Knowing the most important diseases that affect different cereal crops
 - F- A 5- Knowing the most important diseases that affect oil crops
 - G- A6- Knowing the most important diseases that affect fiber crops
 - H- A 7- Identify the most important diseases that affect forage crops
 - I- A8- Finding the best means to combat these diseases

C. Subject-specific skills

- J- B1 Knowing how to diagnose diseases
- K-B2 Knowing how to determine the level of damage, the type and method of appropriate control and the appropriate timing
- L- B3 Knowing how to manage the integrated crop

Teaching and Learning Methods

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.
 - D. Thinking Skills
 - C 1- Instilling values and principles in the student by emphasizing the independence of the statistician when expressing his impartial opinion
 - C 2 Emphasis on personal characteristics such as integrity, honesty, confidentiality and morals.
 - C3 Statement of the importance of the rules of professional conduct and its exposure to legal penalties in case of violation

REPORT OF THE PROPERTY OF THE

C4- Emphasizing the importance of combating financial and administrative corruption by regulatory agencies.

Teaching and Learning Methods

- D 1- The ability to determine the type of plant disease
- D 2- The ability to determine the type of pathogen
- D 3- The ability to determine the type, method and timing of the control

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

- D. General and Transferable Skills (other skills relevant to employability and personal development)
 - D 1- The ability to determine the type of plant disease
 - D 2- The ability to determine the type of pathogen
 - D 3- The ability to determine the type, method and timing of the control

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

PROGRAMME SPECIFICATION

This Programme Specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It is supported by a specification for each course that contributes to the programme.

1. Teaching Institution	University of Anbar
2. University Department/Centre	Plant Protection
3. Programme Title	Agriculture Vocabulary
4. Title of Final Award	Bachelor of Agriculture
5. Modes of Attendance offered	other
6. Accreditation	Study plan for the third stage
7. Other external influences	Related laws and guidelines
8. Date of production/revision of	1/6/2021
this specification	

9. Aims of the Programme

students with know of the nature and methods of insect structure and structure and structure and functions

Understand each insect part its function, and how it affects the ocean

Understand the nature and structure of organs internal organs and how they relate to the other sex by means of suxual pheromones that are released by both females and males for the purpose of the other sex

Provide students with information about the structur of the body wall and the structure of the processes of body wall formation to make compound that prevent the formation of abody wall by knowing about the processes by which the wall is formed Develop their awareness of they have organs the sense in insects the olfactory organs

the touch in insects

Training students scientific lesson and understanding the structure and classification of insects in pest control

10. Learning Outcomes, Teaching, Learning and Assessment Methods

- A. Knowledge and Understanding
- 1- Understand the concept of pest
- 2- Distinguish between a primary lesion and a secondary lesion
- 3- Distinguishing between types of insect, fungal, bacterial, viral and other pests.
- 4- Knowing the level of damage to the pest and when the control order is required
- 5- Knowing the appropriate type of pesticide or pest control and knowing the appropriate timing for the control
- 6-Identification of pesticides and their families and how to deal with them
- 7- Full knowledge of agricultural pest management.
- B. Subject-specific skills
- B1 Knowing how to diagnose the pest
- B 2 Knowing how to determine the level of damage and the type and method of appropriate control and at the appropriate time
- B3 Knowing how to manage the integrated crop

Teaching and Learning Methods

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.
 - C. Thinking Skills
 - C1- Instilling values and principles in the student by emphasizing the independence of the statistician when expressing his impartial opinion
 - C2- Emphasis on personal characteristics such as integrity, honesty, confidentiality and morals.
 - C3 Statement of the importance of the rules of professional conduct and its exposure to legal penalties in case of violation
 - C4- Emphasizing the importance of combating financial and administrative corruption by the regulatory bodies.

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

- D. General and Transferable Skills (other skills relevant to employability and personal development)

 - D1- Determine the type of pest
 D2- Determining the level of economic damage
 D 3- Determining the type, method and timing of the control
 - D4- Integrated pest management

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

TEMPLATE FOR COURSE SPECIFICATION

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

COURSE SPECIFICATION

This Course Specification provides a concise summary of the main features of the course and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the programme specification.

1. Teaching Institution	University of Anbar
2. University Department/Centre	Plant Protection
3. Course title/code	Garden insects/APP3411
4. Programme(s) to which it contributes	Contributes to the knowledge of Biological control
5. Modes of Attendance offered	lectur
6. Semester/Year	Second/fourth
7. Number of hours tuition (total)	75
8. Date of production/revision of this Specification	2021/6/1
9. Aims of the Course	
The goal is to teach students about the hat trees and vegetables in orchards	rms of orchads because they cause damage to

- 10. Learning Outcomes, Teaching ,Learning and Assessment Methode
 - A- Knowledge and Understanding of Integrated pest managment
 - B- Understand the concept of Integrated pest managment
 - A2- Distinguish between the types of Integrated pest managment
 - A 3- Knowing how to diagnose the pest
 - A4 Full knowledge of pests management

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

Assessment methods

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.
 - C. Thinking Skills
 - C 1- Instilling values and principles in the student by emphasizing the independence of the statistician when expressing his impartial opinion
 - C 2 Emphasis on personal characteristics such as integrity, honesty, confidentiality and morals.
 - C3 Statement of the importance of the rules of professional conduct and its exposure to legal penalties in case of violation
 - C4- Emphasizing the importance of combating financial and administrative corruption by regulatory agencies.

Teaching and Learning Methods

- D 1- The ability to determine the type Full knowledge of pests management
- D 2- The ability to determine the level of economic damage
- D 3- The ability to determine the type, method and timing of the control
- D 4- The ability to integrated management of nematode diseases

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

- D. General and Transferable Skills (other skills relevant to employability and personal development)
 D 1- The ability to determine the type of integrated management
 D 2- The ability to determine the level of economic damage
 D 3- The ability to determine the type, method and timing of the control

 - D 4- The ability to integrated management of pests

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

PROGRAMME SPECIFICATION

This Programme Specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It is supported by a specification for each course that contributes to the programme.

1. Teaching Institution	University of Anbar
2. University Department/Centre	Plant Protection
3. Programme Title	Agriculture Vocabulary
4. Title of Final Award	Bachelor of Agriculture
5. Modes of Attendance offered	other
6. Accreditation	Study plan for the second stage
7. Other external influences	Related laws and guidelines
8. Date of production/revision of	1/6/2021
this specification	

9. Aims of the Programme

students with knowledge of the nature and methods of medical and veterinary insect diagnosis in terms of insect damage ,transport methods and control

Understand the nature of nature of veterinary pests according to scientific standards

Understand the nature of the damage medical and veteriny insects carry, the diseases they transmit and the environment in which they live

Provide students with information about medical and veterinary insects

Develop their awarenessof about dealing with chemical pesticides and how to get rid of the residue

Training students based on summer training system in the specialized support

10. Learning Outcomes, Teaching, Learning and Assessment Methods

- A. Knowledge and Understanding
- 1- Understand the concept of pest
- 2- Distinguish between a primary lesion and a secondary lesion
- 3- Distinguishing between types of insect, fungal, bacterial, viral and other pests.
- 4- Knowing the level of damage to the pest and when the control order is required
- 5- Knowing the appropriate type of pesticide or pest control and knowing the appropriate timing for the control
- 6-Identification of pesticides and their families and how to deal with them
- 7- Full knowledge of agricultural pest management.
- B. Subject-specific skills
- B1 Knowing how to diagnose the pest
- B 2 Knowing how to determine the level of damage and the type and method of appropriate control and at the appropriate time
- B3 Knowing how to manage the integrated crop

Teaching and Learning Methods

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.
 - C. Thinking Skills
 - C1- Instilling values and principles in the student by emphasizing the independence of the statistician when expressing his impartial opinion
 - C2- Emphasis on personal characteristics such as integrity, honesty, confidentiality and morals.
 - C3 Statement of the importance of the rules of professional conduct and its exposure to legal penalties in case of violation
 - C4- Emphasizing the importance of combating financial and administrative corruption by the regulatory bodies.

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

- D. General and Transferable Skills (other skills relevant to employability and personal development)

 - D1- Determine the type of pest
 D2- Determining the level of economic damage
 D 3- Determining the type, method and timing of the control
 - D4- Integrated pest management

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

Encouraging students to achieve the highest grades in the study stages in the college so that they can be the first in order to achieve their dreams future students from completing their studies in postgraduate studies and encouraging them to enroll in postgraduate studies.

14. Admission criteria.

The average of the student in the high school, taking into account the desire of the student

15. Key sources of information about the programme

Methodological books (books, magazines, periodicals, and websites) specialized in the field of plant protection

TEMPLATE FOR COURSE SPECIFICATION

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

COURSE SPECIFICATION

This Course Specification provides a concise summary of the main features of the course and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the programme specification.

1. Teaching Institution	University of Anbar
2. University Department/Centre	Plant Protection
3. Course title/code	Medical and veterinary insect/APP3213
4. Programme(s) to which it contributes	Contributes to the knowledge of Biological control
5. Modes of Attendance offered	lectur
6. Semester/Year	First/second
7. Number of hours tuition (total)	75
8. Date of production/revision of this Specification	2021/6/1
9. Aims of the Course	
The goal is to teach students about medic infect them, their life cycle ,how to transport control	al and veterinary insects and families that mit them and how to be appropriate for

- 10. Learning Outcomes, Teaching ,Learning and Assessment Methode
 - A- Knowledge and Understanding of Integrated pest managment
 - B- Understand the concept of Integrated pest managment
 - A2- Distinguish between the types of Integrated pest managment
 - A 3- Knowing how to diagnose the pest
 - A4 Full knowledge of pests management

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

Assessment methods

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.
 - C. Thinking Skills
 - C 1- Instilling values and principles in the student by emphasizing the independence of the statistician when expressing his impartial opinion
 - C 2 Emphasis on personal characteristics such as integrity, honesty, confidentiality and morals.
 - C3 Statement of the importance of the rules of professional conduct and its exposure to legal penalties in case of violation
 - C4- Emphasizing the importance of combating financial and administrative corruption by regulatory agencies.

Teaching and Learning Methods

- D 1- The ability to determine the type Full knowledge of pests management
- D 2- The ability to determine the level of economic damage
- D 3- The ability to determine the type, method and timing of the control
- D 4- The ability to integrated management of nematode diseases

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

- D. General and Transferable Skills (other skills relevant to employability and personal development)
 D 1- The ability to determine the type of integrated management
 D 2- The ability to determine the level of economic damage
 D 3- The ability to determine the type, method and timing of the control

 - D 4- The ability to integrated management of pests

11. Cour	rse Structu	re

TEMPLATE FOR PROGRAMME SPECIFICATION

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

PROGRAMME SPECIFICATION

This Programme Specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It is supported by a specification for each course that contributes to the programme.

1. Teaching Institution	University of Anbar
2. University Department/Centre	Plant Protection
3. Programme Title	Agriculture Vocabulary
4. Title of Final Award	Bachelor of Agriculture
5. Modes of Attendance offered	other
6. Accreditation	Study plan for the fourth stage
7. Other external influences	Related laws and guidelines
8. Date of production/revision of	1/6/2021
this specification	

9. Aims of the Programme

Providing students with knowledge of the nature and methods of diagnosing agricultural pests and combating them from an academic and professional point of view

Understand the nature of agricultural pests and their livelihood according to scientific standards

Understand the nature of direct and indirect economic damage caused by agricultural pests and how to deal with them according to correct applied scientific methods

Provide students with information on how to manage IPM programs of pests

Develop their awareness regarding dealing with chemical pesticides and how to dispose of their residues

10. Learning Outcomes, Teaching, Learning and Assessment Methods

- A. Knowledge and Understanding
- 1- Understand the concept of pest
- 2- Distinguish between a primary lesion and a secondary lesion
- 3- Distinguishing between types of insect, fungal, bacterial, viral and other pests.
- 4- Knowing the level of damage to the pest and when the control order is required
- 5- Knowing the appropriate type of pesticide or pest control and knowing the appropriate timing for the control
- 6-Identification of pesticides and their families and how to deal with them
- 7- Full knowledge of agricultural pest management.
 - B. Subject-specific skills
 - B1 Knowing how to diagnose the pest
 - B 2 Knowing how to determine the level of damage and the type and method of appropriate control and at the appropriate time
 - B3 Knowing how to manage the integrated crop

Teaching and Learning Methods

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.
 - C. Thinking Skills
 - C1- Instilling values and principles in the student by emphasizing the independence of the statistician when expressing his impartial opinion
 - C2- Emphasis on personal characteristics such as integrity, honesty, confidentiality and morals.
 - C3 Statement of the importance of the rules of professional conduct and its exposure to legal penalties in case of violation
 - C4- Emphasizing the importance of combating financial and administrative corruption by the regulatory bodies.

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

- D. General and Transferable Skills (other skills relevant to employability and personal development)

 - D1- Determine the type of pest
 D2- Determining the level of economic damage
 D 3- Determining the type, method and timing of the control
 - D4- Integrated pest management

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

A Change Editor

Encouraging students to achieve the highest grades in the study stages in the college so that they can be the first in order to achieve their dreams future students from completing their studies in postgraduate studies and encouraging them to enroll in postgraduate studies.

14. Admission criteria.

The average of the student in the high school, taking into account the desire of the student

15. Key sources of information about the programme

Methodological books (books, magazines, periodicals, and websites) specialized in the field of plant protection

TEMPLATE FOR COURSE SPECIFICATION

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

COURSE SPECIFICATION

1. Teaching Institution

This Course Specification provides a concise summary of the main features of the course and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the programme specification.

University of Anbar

2. University Department/Centre	Plant Protection
3. Course title/code	Pests of stores
4. Programme(s) to which it contributes	Contributes to the knowledge of the pests of stores
5. Modes of Attendance offered	attendance
6. Semester/Year	first trimester / fourth stage
7. Number of hours tuition (total)	75
8. Date of production/revision of this Specification	2021/6/1
9. Aims of the Course	
and trading in Silos and the test caused by direct and indirect economic and food co	-

- 10. Learning Outcomes, Teaching ,Learning and Assessment Methods
 - A- Knowledge and Understanding
 - 1 lectures include
 - A Know the importance of cereals and storage methods of traditional and modern.
 - (B) Discrimination between the types of damage caused by insects of other stores and other extras.
 - C Discrimination between different types of insects of stores, partition methods and life cycles.
 - D Determine the best ways to resist insecticides and stacks and reduce damage.
 - E. Knowledge of other types of stored grain and damage and how to be addressed.
 - 2 Worksheets
 - 3 online studies
 - 4 Scientific visits
 - 5. Duties
 - C. Subject-specific skills
 - B1 Know the appropriate methods for grain storage and how trading
 - B2 Know the use of the taxonomic keys for insects and other pests
 - B3 Know how the types of pesticides or appropriate methods to avoid injury stores
 - B4- Ways to take samples and examine the safety of grain storage

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

- D. Thinking Skills
 - C 1- Instilling values and principles in the student by emphasizing the independence of the statistician when expressing his impartial opinion
 - C 2 Emphasis on personal characteristics such as integrity, honesty, confidentiality and morals.
 - C3 Statement of the importance of the rules of professional conduct and its exposure to legal penalties in case of violation
 - C4- Emphasizing the importance of combating financial and administrative corruption by regulatory agencies.

- D1. Ability to determine the type of damage in the stores
- D2 Ability to determine the type of insect
- D3 Ability to determine the type, method and timing of control
 - D4 The ability to know and apply the storage in good management

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

- A. General and Transferable Skills (other skills relevant to employability and personal development)
 D1. Ability to determine the type of damage in the stores
 D2 - Ability to determine the type of insect
 D3 - Ability to determine the type, method and timing of control
 D4 - The ability to know and apply the storage in good management

11. Course Structure						
Week	Hours	ILOs	Unit/Module or Topic Title	Teaching Method	Assessment Method	
1	5	brief history in the importance of cereal	1 - Why we store grain2 - The importance of grain storage3 - Traditional methods of grain storage	Lecture	quiz	
2	5	Modern methods in grain storage	 1.kinds of modern stores 2. Specification of modern stores 3. Convenient stores for stored grain type 		quiz	
3	5	The damage caused by insects of stores	1.kinds of direct damage2. Informed damage types3. The virtual damage and non-virtual damage to the grain	Lecture	quiz

TEMPLATE FOR PROGRAMME SPECIFICATION

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

PROGRAMME SPECIFICATION

This Programme Specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It is supported by a specification for each course that contributes to the programme.

1. Teaching Institution	University of Anbar
2. University Department/Centre	Plant Protection
3. Programme Title	Agriculture Vocabulary
4. Title of Final Award	Bachelor of Agriculture
5. Modes of Attendance offered	other
6. Accreditation	Study plan for the Third stage
7. Other external influences	Related laws and guidelines
8. Date of production/revision of	1/6/2021
this specification	

9. Aims of the Programme

Providing students with knowledge of the nature structure and functions of insect organs

Understand each insect part its function and how it affects the ocean

Understand the nature and structure of internal organs and how they relate to the opposite sex by means of sexual pheromones released by both females and males for the purpose of the opposite sex

Provide students with information about the structure of the body wall and the structure of the processes of body wall formation to make compounds about the processes by which the body wall is formed

Develop their awareness of the insect sense organs and the insect smell and touch

organs

10. Learning Outcomes, Teaching, Learning and Assessment Methods

- A. Knowledge and Understanding
- 1- Understand the concept of pest
- 2- Distinguish between a primary lesion and a secondary lesion
- 3- Distinguishing between types of insect, fungal, bacterial, viral and other pests.
- 4- Knowing the level of damage to the pest and when the control order is required
- 5- Knowing the appropriate type of pesticide or pest control and knowing the appropriate timing for the control
- 6-Identification of pesticides and their families and how to deal with them
- 7- Full knowledge of agricultural pest management.
- B. Subject-specific skills
- B1 Knowing how to diagnose the pest
- B 2 Knowing how to determine the level of damage and the type and method of appropriate control and at the appropriate time
- B3 Knowing how to manage the integrated crop

Teaching and Learning Methods

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.
 - C. Thinking Skills
 - C1- Instilling values and principles in the student by emphasizing the independence of the statistician when expressing his impartial opinion
 - C2- Emphasis on personal characteristics such as integrity, honesty, confidentiality and morals.
 - C3 Statement of the importance of the rules of professional conduct and its exposure to legal penalties in case of violation
 - C4- Emphasizing the importance of combating financial and administrative corruption by the regulatory bodies.

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

- D. General and Transferable Skills (other skills relevant to employability and personal development)

 - D1- Determine the type of pest
 D2- Determining the level of economic damage
 D 3- Determining the type, method and timing of the control
 - D4- Integrated pest management

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

Encouraging students to achieve the highest grades in the study stages in the college so that they can be the first in order to achieve their dreams future students from completing their studies in postgraduate studies and encouraging them to enroll in postgraduate studies.

14. Admission criteria.

The average of the student in the high school, taking into account the desire of the student

15. Key sources of information about the programme

Methodological books (books, magazines, periodicals, and websites) specialized in the field of plant protection

TEMPLATE FOR COURSE SPECIFICATION

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

COURSE SPECIFICATION

This Course Specification provides a concise summary of the main features of the course and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the programme specification.

1. Teaching Institution	University of Anbar
2. University Department/Centre	Plant Protection
3. Course title/code	Insect physiology /APP3305
4. Programme(s) to which it contributes	Contributes to the knowledge of Biological control
5. Modes of Attendance offered	lectur
6. Semester/Year	First/third
7. Number of hours tuition (total)	75
8. Date of production/revision of this Specification	2021/6/1
9. Aims of the Course	
The course is designed to teach students t structure	the insect interior internal organ function and

- 10. Learning Outcomes, Teaching ,Learning and Assessment Methode
 - A- Knowledge and Understanding of Integrated pest managment
 - B- Understand the concept of Integrated pest managment
 - A2- Distinguish between the types of Integrated pest managment
 - A 3- Knowing how to diagnose the pest
 - A4 Full knowledge of pests management

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

Assessment methods

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.
 - C. Thinking Skills
 - C 1- Instilling values and principles in the student by emphasizing the independence of the statistician when expressing his impartial opinion
 - C 2 Emphasis on personal characteristics such as integrity, honesty, confidentiality and morals.
 - C3 Statement of the importance of the rules of professional conduct and its exposure to legal penalties in case of violation
 - C4- Emphasizing the importance of combating financial and administrative corruption by regulatory agencies.

Teaching and Learning Methods

- D 1- The ability to determine the type Full knowledge of pests management
- D 2- The ability to determine the level of economic damage
- D 3- The ability to determine the type, method and timing of the control
- D 4- The ability to integrated management of nematode diseases

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

- D. General and Transferable Skills (other skills relevant to employability and personal development)
 D 1- The ability to determine the type of integrated management
 D 2- The ability to determine the level of economic damage
 D 3- The ability to determine the type, method and timing of the control

 - D 4- The ability to integrated management of pests

TEMPLATE FOR PROGRAMME SPECIFICATION

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

PROGRAMME SPECIFICATION

This Programme Specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It is supported by a specification for each course that contributes to the programme.

1. Teaching Institution	University of Anbar
2. University Department/Centre	Plant Protection
3. Programme Title	Agriculture Vocabulary
4. Title of Final Award	Bachelor of Agriculture
5. Modes of Attendance offered	other
6. Accreditation	Study plan for the fourth stage
7. Other external influences	Related laws and guidelines
8. Date of production/revision of	1/6/2021
this specification	

9. Aims of the Programme

Providing students with knowledge of the nature and methods of diagnosing agricultural pests and combating them from an academic and professional point of view

Understand the nature of agricultural pests and their livelihood according to scientific standards

Understand the nature of direct and indirect economic damage caused by agricultural pests and how to deal with them according to correct applied scientific methods

Provide students with information on how to manage IPM programs of pests

Develop their awareness regarding dealing with chemical pesticides and how to dispose of their residues

10. Learning Outcomes, Teaching, Learning and Assessment Methods

- A. Knowledge and Understanding
- 1- Understand the concept of pest
- 2- Distinguish between a primary lesion and a secondary lesion
- 3- Distinguishing between types of insect, fungal, bacterial, viral and other pests.
- 4- Knowing the level of damage to the pest and when the control order is required
- 5- Knowing the appropriate type of pesticide or pest control and knowing the appropriate timing for the control
- 6-Identification of pesticides and their families and how to deal with them
- 7- Full knowledge of agricultural pest management.
 - B. Subject-specific skills
 - B1 Knowing how to diagnose the pest
 - B 2 Knowing how to determine the level of damage and the type and method of appropriate control and at the appropriate time
 - B3 Knowing how to manage the integrated crop

Teaching and Learning Methods

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.
 - C. Thinking Skills
 - C1- Instilling values and principles in the student by emphasizing the independence of the statistician when expressing his impartial opinion
 - C2- Emphasis on personal characteristics such as integrity, honesty, confidentiality and morals.
 - C3 Statement of the importance of the rules of professional conduct and its exposure to legal penalties in case of violation
 - C4- Emphasizing the importance of combating financial and administrative corruption by the regulatory bodies.

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

- D. General and Transferable Skills (other skills relevant to employability and personal development)

 - D1- Determine the type of pest
 D2- Determining the level of economic damage
 D 3- Determining the type, method and timing of the control
 - D4- Integrated pest management

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

A Change Editor

Encouraging students to achieve the highest grades in the study stages in the college so that they can be the first in order to achieve their dreams future students from completing their studies in postgraduate studies and encouraging them to enroll in postgraduate studies.

14. Admission criteria.

The average of the student in the high school, taking into account the desire of the student

15. Key sources of information about the programme

Methodological books (books, magazines, periodicals, and websites) specialized in the field of plant protection

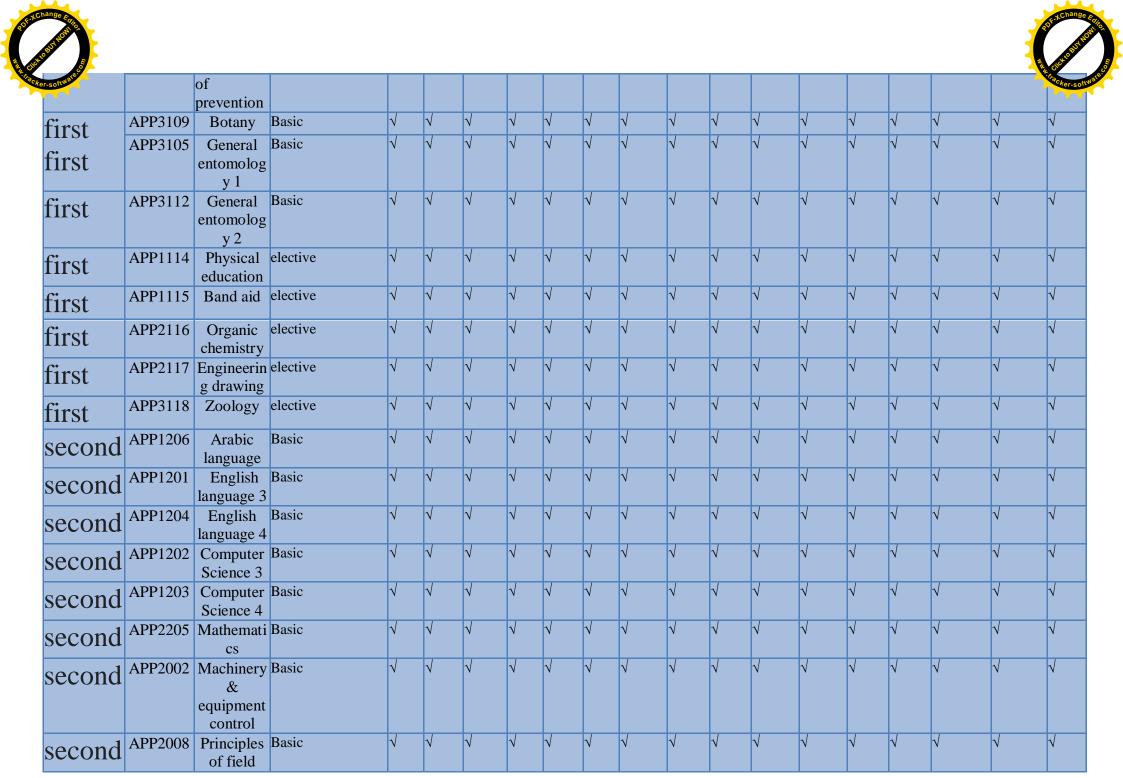

Curriculum Skills Map

TEMPLATE FOR COURSE SPECIFICATION

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

COURSE SPECIFICATION

This Course Specification provides a concise summary of the main features of the course and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the programme specification.

1. Teaching Institution	University of Anbar
2. University Department/Centre	Plant Protection
3. Course title/code	Mycology 1APP3303
4. Programme(s) to which it contributes	Contributes to the knowledge of fungi pests
5. Modes of Attendance offered	attendance
6. Semester/Year	first trimester / third stage
7. Number of hours tuition (total)	75
8. Date of production/revision of this Specification	2021/6/1
9. Aims of the Course	
The course aims to teach students what findirect economic damages to agricultura	ungi are, fungi science, and their direct and al crops
What are the symptoms of infection and scientific and correct ways and at the low	how to diagnose and combat it in the best vest costs.

10. Learning Outcomes, Teaching ,Learning and Assessment Methode

A- Knowledge and Understanding

- A1- Understand the concept of fungi
- A2- Distinguish between the types of fungi
- A 3- Distinguish between diseases caused by fungi
- A4- Knowing the level of damage to fungi and when it requires control
- A 5- Knowing to determine the type of pesticide or appropriate control of fungi with knowledge of the appropriate timing for the control
- A 6- Full knowledge of fungi management.

C. Subject-specific skills

- B1 Knowing how to diagnose fungi and their diseases
- B2 Knowing how to determine the level of damage and the type and method of appropriate control at the appropriate time
- B3 Knowing how to manage the integrated crop

Teaching and Learning Methods

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

Assessment methods

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

D. Thinking Skills

- C 1- Instilling values and principles in the student by emphasizing the independence of the statistician when expressing his impartial opinion
- C 2 Emphasis on personal characteristics such as integrity, honesty, confidentiality and morals.
- C3 Statement of the importance of the rules of professional conduct and its exposure to legal penalties in case of violation
- C4- Emphasizing the importance of combating financial and administrative corruption by regulatory agencies.

Teaching and Learning Methods

- D 1- The ability to determine the type of fungi disease
- D 2- The ability to determine the level of economic damage
- D 3- The ability to determine the type, method and timing of the control
- D 4- The ability to integrated management of fungi diseases

Assessment methods

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

- D. General and Transferable Skills (other skills relevant to employability and personal development)

 D 1- The ability to determine the type of fungi disease
 D 2- The ability to determine the level of economic damage
 D 3- The ability to determine the type, method and timing of the control

 - D 4- The ability to integrated management of fungi diseases

وصف البرنامج الأكاديمي

يوفر وصف البرنامج الأكاديمي هذا ايجازاً مقتضياً لأهم خصائص البرنامج ومخرجات التعلم المتوقعة من الطالب تحقيقها مبرهناً عما إذا كان قد حقق الاستفادة القصوى من الفرص المتاحة . ويصاحبه وصف لكل مقرر ضمن البرنامج

جامعة الانبار	1. المؤسسة التعليمية
وقاية النبات	2. القسم العلمي / المركز
مفردات زراعة	 اسم البرنامج الأكاديمي او
بكلوريوس زراعة	المهني 4. اسم الشهادة النهائية
اخرى	 النظام الدراسي :
الخطة الدر اسية للمرحلة الرابعة	سنوي /مقرر آت /أخرى 6. برنامج الاعتماد المعتمد
القوانين والارشادات ذات العلاقة	7. المؤثرات الخارجية الأخرى
2021/6/1	8. تاريخ إعداد الوصف
	9. أهداف البرنامج الأكاديمي
ب تشخيص الافات الزراعية ومكافحتها من الناحية االاكاديمية والمهنية	-أكساب الطلبة معرفة بطبيعة و اساليد
	فهم طبيعة الافات الزراعية ومعيشتها
سرة وغير المباشرة الناجمة عن الافات الزراعية وكيفية التعامل معها	و فق اساليب علمية تطيبقية صحيحة
ادارة برامج الادارة المتكاملة للافات	تزويد الطلبة بمعلومات تخص كيفية
مل مع المبيدات الكيمياوية وكيفية التخلص من متبقياتها	
ريب الصيفي في الجهات المختصة المساندة مثل الشعب الزراعية	تدريب الطلبة بالاعتماد على نظام التد والحجر الزراعي

10. مخرجات البرنامج المطلوبة وطرائق التعليم والتعلم والتقييم

£ الاهداف المعرفية

1 -فهم مفهوم الافة

2 - التمييز بين الافة الرئسية والافة الثانوية

3-التمييز بين انواع الافات الحشرية والفطرية والبكتيرية والفايروسة وغيرها .

4-معرفة تحديد مستوى الضرر للافة ومتى تستوجب امر المكافحة

5-معرفة تحديد نوع المبيد او المكافحة الملائمة للافة مع معرفة التوقيت المناسب للمكافحة

6-التعرف بالمبيدات وعوائلها وكيفية التعامل معها

7- المعرفة التامة بادارة الافات الزراعية.

ب - الأهداف المهاراتية الخاصة بالبرنامج

ب 1 _ معرفة كيفية تشخيص الافة

ب 2 - معرفة كيفية تحديد مستوى الضرر ونوع وطريقة المكافحة المناسبة و التوقيت المناسب

ب 3 - معرفة كيفية الادارة المتكاملة للمحصول

طرائق التعليم والتعلم

1-اعتماد اسلوب القاء المحاضرات وربط كل موضوع بأمثلة من واقع حال عمل الزراعة

2-أعطائهم بعض التمارين العملية البسيطة والتي يجري مناقشتها من قبل الطلبة وحلها اثناء المحاضرة وبمشاركة كافة الطلبة في الشعبة مع الأستاذ لإعطاء المادة كنوع من التفاعل.

3- تدريب الطلاب بالمختبرات من خلال اجراء الفحوصات المختبرية اللازمة في التشخيص

4- التدريب الصيفي في المؤسسات الساندة مثل مديريات الزراعة والسايلوات والحجر الزراعي

طرائق التقييم

1 -من خلال مشاركة الطلبة بالمحاضرة بالاعتماد على تحضير هم المسبق للمادة.

2 -إعطائهم تمرين كواجب بيتي وطلب حله بأوراق مستقلة يجمع منهم بالمحاضرة التالية.

3 -اعطاء الطلبة دراسة حالة وتقسيم الطلبة الى مجمو عات لكتابة تقرير حول تلك الدراسة.

4 -التقييم من خلال الامتحانات الشهرية.

ج- الأهداف الوجدانية والقيمية .

ج1-زرع القيم والمبادئ لدى الطالب من خلال التأكيد على استقلالية الإحصائي عند ابداء رأيه المحايد ج2-التأكيد على السمات الشخصية كالنزاهة والأمانة والسرية والأخلق.

-3-بيان اهمية قواعد السلوك المهني وتعرضه للعقوبات القانونية في حالة مخالفته -3-التأكيد على اهمية محاربة الفساد المالي والإداري من قبل الأجهزة الرقابية.

د -المهارات العامة والتأهيلية المنقولة (المهارات الأخرى المتعلقة بقابلية التوظيف والتطور الشخصي).

د1- تحديد نوع الافة

د2- تحديد مستوى الضرر الاقتصادي

د3- تحديد نوع وطريقة وتوقيت المكافحة

د4- الادارة المتكاملة للافات

12.التخطيط للتطور الشخصىي

تشجيع الطلبة على تحقيق اعلى العلامات في المراحل الدراسة في الكلية كي يكونوا الاوائل بغية تحقيق أحلامهم

المستقبلية من اكمال دراستهم في الدراسات العليا وتشجيعهم على الالتحاق بالدراسات العليا.

13 معيار القبول (وضع الأنظمة المتعلقة بالالتحاق بالكلية أو المعهد)

معدلالطالب في المرحلة الاعدادية مع الاخذ بالاعتبار رغبة الطالب

14.أهم مصادر المعلومات عن البرنامج

الكتب المنهجية و(الكتب والمجلات والدوريات ومواقع الانترنيت) العلمية المختصة في مجال وقاية النبات

نموذج وصف المقرر

وصف المقرر

يوفر وصف المقرر هذا إيجازاً مقتضياً لأهم خصائص المقرر ومخرجات التعلم المتوقعة من الطالب تحقيقها مبرهناً عما إذا كان قد حقق الاستفادة القصوى من فرص التعلم المتاحة. ولابد من الربط بينها وبين وصف البرنامج. ؟

	8. أهداف المقرر
وعلم الفطريات واضرارها الاقتصادية المباشرة وغير المباشرة على المحاصيل الزراعية	يهدف المقرر الى تعليم الطلبة بماهية االفطريات و
مكافحتها بافضل الطرق العلمية الصحيحة وباقل التكاليف .	امات الامالة على المامات
كافحتها باقطال الطرق العلمية الطبحيحة وباقل التكاليف.	وما هي اعراض الأصابة ها وتيقية تسخيصها وه

10. مخرجات المقرر وطرائق التعليم والتعلم والتقييم

أ- الأهداف المعرفية

- أ1- فهم مفهوم علم الفطريات
- أ2- التمييز بين انوع الفطريات
- أ3- التمييز بين الامراض التي تسببها الفطريات.
- أ4- معرفة تحديد مستوى الفطريات ومتى تستوجب امر المكافحة
- أ5- معرفة تحديد نوع المبيد او المكافحة الملائمة للفطريات مع معرفة التوقيت المناسب للمكافحة
 - أ6- المعرفة التامة بادارة الافات الزراعية.

ب - الأهداف المهار اتية الخاصة بالمقرر.

- ب1 معرفة كيفية تشخيص الفطريات وامراضها
- ب2 معرفة كيفية تحديد مستوى الضرر ونوع وطريقة المكافحة المناسبة وع التوقيت المناسب
 - ب3 معرفة كيفية الادارة المتكاملة للمحصول
 - ب4-

طرائق التعليم والتعلم

- 1-اعتماد اسلوب القاء المحاضرات وربط كل موضوع بأمثلة من واقع حال عمل الزراعة
- 2-أعطائهم بعض التمارين العملية البسيطة والتي يجري مناقشتها من قبل الطلبة وحلها اثناء المحاضرة وبمشاركة كافة الطلبة في الشعبة مع الأستاذ لإعطاء المادة كنوع من التفاعل.
 - 3- تدريب الطلاب بالمختبرات من خلال اجراء الفحوصات المختبرية اللازمة في التشخيص
 - 4- التدريب الصيفي في المؤسسات الساندة مثل مديريات الزراعة والسايلوات والحجر الزراعي

طرائق التقييم

- 1 -من خلال مشاركة الطلبة بالمحاضرة بالاعتماد على تحضير هم المسبق للمادة.
- 2 اعطائهم تمرين كواجب بيتي وطلب حله بأوراق مستقلة يجمع منهم بالمحاضرة التالية.
- 3 -اعطاء الطلبة دراسة حالة وتقسيم الطلبة الى مجموعات لكتابة تقرير حول تلك الدراسة.
 - 4 -التقييم من خلال الامتحانات الشهرية.

ج- الأهداف الوجدانية والقيمية

ج1-زرع القيم والمبادئ لدى الطالب من خلال التأكيد على استقلالية الإحصائي عند ابداء رأيه المحايد ج2-التأكيد على السمات الشخصية كالنزاهة والأمانة والسرية والأخلاق.

ج3-بيان اهمية قواعد السلوك المهني وتعرضه للعقوبات القانونية في حالة مخالفته ج4-التأكيد على اهمية محاربة الفساد المالي والإداري من قبل الأجهزة الرقابية.

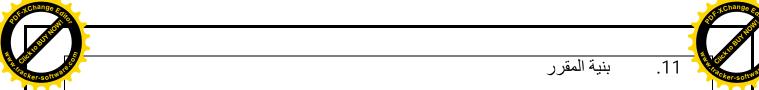

د - المهارات العامة والتأهيلية المنقولة (المهارات الأخرى المتعلقة بقابلية التوظيف والتطور الشخصي).

د1- القدرة على تحديد نوع المرض الفطري

د2- القدرة على تحديد مستوى الضرر الاقتصادي

د3- القدرة على تحديد نوع وطريقة وتوقيت المكافحة

د4- القدرة على الادارة المتكاملة لامراض الفطريات

8. أهداف المقرر

تناقش مفردات هذا المقرر الدراسي (المبيدات) المفاهيم الاساسية للمبيدات وتقسيمها حسب اسس معينة، وطرق مكافحة الأفات بأهم مجاميع المبيدات الكيميائية ومميزات كل مجموعة وطريقة تأثيرها وتأبيضها في الكائنات والبيئة.

10. مخرجات المقرر وطرائق التعليم والتعلم والتقييم

أ- الأهداف المعر فية

- 1 فهم انواع الافات الزراعية والأضرار التي تسببها .
- 2 تعريف المبيد ومعرفة سلبيات وإيجابيات استخدامها .
- 3 معرفة النقاط الواجب إتباعها عند المكافحة الكيمياوية .
- 4- معرفة تحديد مستوى الافة في الحقل ومتى تستوجب المكافحة.
 - 5- المعرفة بعلم السموم وانواع السمية وكيفية تلاشى المبيد .
 - 6-التعرف بالمبيدات وعوائلها وكيفية التعامل معها
 - ب الأهداف المهار اتية الخاصة بالمقرر.
 - ب1 معرفة كيفية تشخيص الافة .
- ب2 معرفة كيفية تحديد مستوى الضرر ونوع وطريقة المكافحة المناسبة و التوقيت المناسب.
 - ب3 معرفة كيفية الادارة المتكاملة للمحصول.

طرائق التعليم والتعلم

1. محاضر ات

2.أوراق عمل

3.دراسات على الانترنت

4 زيارات علمية

5 و اجبات

طرائق التقييم

الامتحان النصفي	25
النشاط	5
الامتحان العملي	0
الامتحان الشفهي	
الامتحان النهائي	70

ج- الأهداف الوجدانية والقيمية

- ج1- زرع القيم والمبادئ لدى الطالب من خلال التأكيد على استقلالية الإحصائي عند ابداء رأيه المحايد ج2- التأكيد على السمات الشخصية كالنزاهة والأمانة والسرية والأخلق.
 - ج3- بيان اهمية قواعد السلوك المهنى وتعرضه للعقوبات القانونية في حالة مخالفته
 - ج4- التأكيد على اهمية محاربة الفساد المالي والإداري من قبل الأجهزة الرقابية.

د1- القدرة على تشخيص الاصابة وعرفة نوع المبيد .

د2- اختيار الطريقة الامثل للمكافحة.

د3- تحديد الضرر للنبات و تحديد نوع المبيد المستخدم لمكافحة الافة .

				بنية المقرر	.11

	12. البنية التحتية
1- المبيدات الكيمياوية في وقاية النبات (1979) .	1- الكتب المقررة المطلوبة
د. خالد محمد العادل ، د. مولود كامل	
2 ـ المبيدات (1993). د. عواد شعبان، د. نزار مصطفى الملاح.	
1 _ مبيدات الأفات ، مفاهيم أساسية ودور ها في المجالين الزراعي	2- المراجع الرئيسية (المصادر)
والصحي (2006) . د. خالد العادل	
Pesticides science	ا الكتب والمراجع التي يوصى بها (المجلات العلمية , التقارير ,)
Principles of plant pest control	(المجلات العلمية, التقارير,)
مواقع تهتم بمواضيع المبيدات	ب ـ المراجع الالكترونية, مواقع الانترنيت

13. خطة تطوير المقرر الدراسي

يتم تحديث المقرر الدراسي سنويا وذلك من خلال متابعة البحوث العلمية الحديثة والدوريات والابحاث.

أ.م.د. خالد وهاب عبادي قسم وقاية النبات / مبيدات

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

COURSE SPECIFICATION

This Course Specification provides a concise summary of the main features of the course and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the programme specification.

1. Teaching Institution	University of Anbar
2. University Department/Centre	Plant Protection
3. Course title/code	Integrated pest managment / APP3412
4. Programme(s) to which it contributes	Contributes to the knowledge of Biological control
5. Modes of Attendance offered	attendance
6. Semester/Year	second trimester fourth stage
7. Number of hours tuition (total)	30
8. Date of production/revision of this Specification	1/6/2021
9. Aims of the Course	
The course aims to teach students what Bi indirect economic damages to agricultural	
What are the symptoms of infection and has scientific and correct ways and at the lower	

- 10. Learning Outcomes, Teaching ,Learning and Assessment Methode
 - A- Knowledge and Understanding of Integrated pest managment
 - B- Understand the concept of Integrated pest managment
 - A2- Distinguish between the types of Integrated pest managment
 - A 3- Knowing how to diagnose the pest
 - A4 Full knowledge of pests management

Teaching and Learning Methods

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

Assessment methods

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.
 - A. Thinking Skills
 - C 1- Instilling values and principles in the student by emphasizing the independence of the statistician when expressing his impartial opinion
 - C 2 Emphasis on personal characteristics such as integrity, honesty, confidentiality and morals.
 - C3 Statement of the importance of the rules of professional conduct and its exposure to legal penalties in case of violation
 - C4- Emphasizing the importance of combating financial and administrative corruption by regulatory agencies.

Teaching and Learning Methods

- D 1- The ability to determine the type Full knowledge of pests management
- D 2- The ability to determine the level of economic damage
- D 3- The ability to determine the type, method and timing of the control
- D 4- The ability to integrated management of nematode diseases

Assessment methods

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

- D. General and Transferable Skills (other skills relevant to employability and personal development)

 D 1- The ability to determine the type of integrated management
 D 2- The ability to determine the level of economic damage
 D 3- The ability to determine the type, method and timing of the control

 - D 4- The ability to integrated management of pests

11. Coui	11. Course Structure				
Week	Hours	ILOs	Unit/Module or Topic Title	Teaching Method	Assessment Method

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

PROGRAMME SPECIFICATION

This Programme Specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It is supported by a specification for each course that contributes to the programme.

1. Teaching Institution	University of Anbar
2. University Department/Centre	Plant Protection
3. Programme Title	Agriculture Vocabulary
4. Title of Final Award	Bachelor of Agriculture
5. Modes of Attendance offered	other
6. Accreditation	Study plan for the fourth stage
7. Other external influences	Related laws and guidelines
8. Date of production/revision of	18/9/2021
this specification	

9. Aims of the Programme

Providing students with knowledge of the nature and methods of diagnosing agricultural pests and combating them from an academic and professional point of view

Understand the nature of agricultural pests and their livelihood according to scientific standards

Understand the nature of direct and indirect economic damage caused by agricultural pests and how to deal with them according to correct applied scientific methods

Provide students with information on how to manage IPM programs of pests

Develop their awareness regarding dealing with chemical pesticides and how to dispose of their residues

10. Learning Outcomes, Teaching, Learning and Assessment Methods

- A. Knowledge and Understanding
- 1- Understand the concept of pest
- 2- Distinguish between a primary lesion and a secondary lesion
- 3- Distinguishing between types of insect, fungal, bacterial, viral and other pests.
- 4- Knowing the level of damage to the pest and when the control order is required
- 5- Knowing the appropriate type of pesticide or pest control and knowing the appropriate timing for the control
- 6-Identification of pesticides and their families and how to deal with them
- 7- Full knowledge of agricultural pest management.
 - B. Subject-specific skills
- B1 Knowing how to diagnose the pest
- B 2 Knowing how to determine the level of damage and the type and method of appropriate control and at the appropriate time
- B3 Knowing how to manage the integrated crop

Teaching and Learning Methods

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.
 - C. Thinking Skills
 - C1- Instilling values and principles in the student by emphasizing the independence of the statistician when expressing his impartial opinion
 - C2- Emphasis on personal characteristics such as integrity, honesty, confidentiality and morals.
 - C3 Statement of the importance of the rules of professional conduct and its exposure to legal penalties in case of violation
 - C4- Emphasizing the importance of combating financial and administrative corruption by the regulatory bodies.

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

- D. General and Transferable Skills (other skills relevant to employability and personal development)

 - D1- Determine the type of pest
 D2- Determining the level of economic damage
 D 3- Determining the type, method and timing of the control
 - D4- Integrated pest management

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

13. Personal Development Planning

Encouraging students to achieve the highest grades in the study stages in the college so that they can be the first in order to achieve their dreams future students from completing their studies in postgraduate studies and encouraging them to enroll in postgraduate studies.

14. Admission criteria.

The average of the student in the high school, taking into account the desire of the student

15. Key sources of information about the programme

Methodological books (books, magazines, periodicals, and websites) specialized in the field of plant protection

TEMPLATE FOR COURSE SPECIFICATION

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

COURSE SPECIFICATION

This Course Specification provides a concise summary of the main features of the course and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the programme specification.

1. Teaching Institution	University of Anbar
2. University Department/Centre	Plant Protection
3. Course title/code	Taxonomy of insects 2/ APP3212
4. Programme(s) to which it contributes	Contributes to the knowledge of the mechanism of insect anatomy
5. Modes of Attendance offered	attendance
6. Semester/Year	First trimester / first stage
7. Number of hours tuition (total)	75
8. Date of production/revision of this Specification	2020/3/18
9. Aims of the Course	
The course aims to introduce students to harms and benefits of insects, to know th development, impossibility, and the divis of each type.	· · · · · · · · · · · · · · · · · · ·

- 10. Learning Outcomes, Teaching ,Learning and Assessment Methode
 - A1- Understand the concept of entomology
 - A 2- Distinguish between the different parts of the body in insects
 - A3- Identify the structure of each part of the insect's body
 - A 4- Full knowledge of the most important benefits and harms caused by insects
 - C. Subject-specific skills
 - B1 Knowing how to harden insects and making insect models that are impregnated
 - B2 Identify and control beneficial insects and harmful insects

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

Assessment methods

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.
 - D. Thinking Skills
 - C 1- Instilling values and principles in the student by emphasizing the independence of the statistician when expressing his impartial opinion
 - C 2 Emphasis on personal characteristics such as integrity, honesty, confidentiality and morals.
 - C3 Statement of the importance of the rules of professional conduct and its exposure to legal penalties in case of violation
 - C4- Emphasizing the importance of combating financial and administrative corruption by regulatory agencies.

Teaching and Learning Methods

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

- D. General and Transferable Skills (other skills relevant to employability and personal development)
 D 1- The ability to dissect insect pests
 D2- The ability to determine the nature of the insect's life and target it at the

 - appropriate time

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

PROGRAMME SPECIFICATION

This Programme Specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It is supported by a specification for each course that contributes to the programme.

1. Teaching Institution	University of Anbar	
2. University Department/Centre	Plant Protection	
3. Programme Title	Agriculture Vocabulary	
4. Title of Final Award	Bachelor of Agriculture	
5. Modes of Attendance offered	other	
6. Accreditation	Study plan for the fourth stage	
7. Other external influences	Related laws and guidelines	
8. Date of production/revision of	18/9/2021	
this specification		

9. Aims of the Programme

Providing students with knowledge of the nature and methods of diagnosing agricultural pests and combating them from an academic and professional point of view

Understand the nature of agricultural pests and their livelihood according to scientific standards

Understand the nature of direct and indirect economic damage caused by agricultural pests and how to deal with them according to correct applied scientific methods

Provide students with information on how to manage IPM programs of pests

Develop their awareness regarding dealing with chemical pesticides and how to dispose of their residues

10. Learning Outcomes, Teaching, Learning and Assessment Methods

- A. Knowledge and Understanding
- 1- Understand the concept of pest
- 2- Distinguish between a primary lesion and a secondary lesion
- 3- Distinguishing between types of insect, fungal, bacterial, viral and other pests.
- 4- Knowing the level of damage to the pest and when the control order is required
- 5- Knowing the appropriate type of pesticide or pest control and knowing the appropriate timing for the control
- 6-Identification of pesticides and their families and how to deal with them
- 7- Full knowledge of agricultural pest management.
 - B. Subject-specific skills
- B1 Knowing how to diagnose the pest
- B 2 Knowing how to determine the level of damage and the type and method of appropriate control and at the appropriate time
- B3 Knowing how to manage the integrated crop

Teaching and Learning Methods

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.
 - C. Thinking Skills
 - C1- Instilling values and principles in the student by emphasizing the independence of the statistician when expressing his impartial opinion
 - C2- Emphasis on personal characteristics such as integrity, honesty, confidentiality and morals.
 - C3 Statement of the importance of the rules of professional conduct and its exposure to legal penalties in case of violation
 - C4- Emphasizing the importance of combating financial and administrative corruption by the regulatory bodies.

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

- D. General and Transferable Skills (other skills relevant to employability and personal development)

 - D1- Determine the type of pest
 D2- Determining the level of economic damage
 D 3- Determining the type, method and timing of the control
 - D4- Integrated pest management

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

TEMPLATE FOR COURSE SPECIFICATION

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

COURSE SPECIFICATION

This Course Specification provides a concise summary of the main features of the course and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the programme specification.

1. Teaching Institution	University of Anbar
2. University Department/Centre	Plant Protection
3. Course title/code	General entomology 2\ APP3112
4. Programme(s) to which it contributes	Contributes to the knowledge of the mechanism of insect anatomy
5. Modes of Attendance offered	attendance
6. Semester/Year	Second trimester / first stage
7. Number of hours tuition (total)	50
8. Date of production/revision of this Specification	2021/9/18
9. Aims of the Course	
of action of each of them, and the differe	the internal parts of insects, the mechanism nces between insects belonging to different ting mechanism, and parts of each of them.

- 10. Learning Outcomes, Teaching ,Learning and Assessment Methode
 - A- Knowledge and Understanding
 - A1- Understand the concept of entomology
 - A 2- Distinguish between the different internal organs in insects
 - A3- Understand the mechanism of action of the various internal organs in insects
 - A4- Full knowledge of agricultural pest management
 - C. Subject-specific skills
 - B1 Knowing how to anatomy of insects
 - B2 Identifying the mechanism of work of the devices and the possibility of investing them in controlling the pest by knowing its weaknesses

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

Assessment methods

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.
 - D. Thinking Skills
 - C 1- Instilling values and principles in the student by emphasizing the independence of the statistician when expressing his impartial opinion
 - C 2 Emphasis on personal characteristics such as integrity, honesty, confidentiality and morals.
 - C3 Statement of the importance of the rules of professional conduct and its exposure to legal penalties in case of violation
 - C4- Emphasizing the importance of combating financial and administrative corruption by regulatory agencies.

Teaching and Learning Methods

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

- D. General and Transferable Skills (other skills relevant to employability and personal development)
 D 1- The ability to dissect insect pests
 D2- The ability to determine the nature of the insect's life and target it at the

 - appropriate time

TEMPLATE FOR PROGRAMME SPECIFICATION

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

PROGRAMME SPECIFICATION

This Programme Specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It is supported by a specification for each course that contributes to the programme.

1. Teaching Institution	University of Anbar
2. University Department/Centre	Plant Protection
3. Programme Title	Agriculture Vocabulary
4. Title of Final Award	Bachelor of Agriculture
5. Modes of Attendance offered	other
6. Accreditation	Study plan for the fourth stage
7. Other external influences	Related laws and guidelines
8. Date of production/revision of	18/3/2020
this specification	

9. Aims of the Programme

Providing students with knowledge of the nature and methods of diagnosing agricultural pests and combating them from an academic and professional point of view

Understand the nature of agricultural pests and their livelihood according to scientific standards

Understand the nature of direct and indirect economic damage caused by agricultural pests and how to deal with them according to correct applied scientific methods

Provide students with information on how to manage IPM programs of pests

Develop their awareness regarding dealing with chemical pesticides and how to dispose of their residues

10. Learning Outcomes, Teaching, Learning and Assessment Methods

- A. Knowledge and Understanding
- 1- Understand the concept of pest
- 2- Distinguish between a primary lesion and a secondary lesion
- 3- Distinguishing between types of insect, fungal, bacterial, viral and other pests.
- 4- Knowing the level of damage to the pest and when the control order is required
- 5- Knowing the appropriate type of pesticide or pest control and knowing the appropriate timing for the control
- 6-Identification of pesticides and their families and how to deal with them
- 7- Full knowledge of agricultural pest management.
 - B. Subject-specific skills
- B1 Knowing how to diagnose the pest
- B 2 Knowing how to determine the level of damage and the type and method of appropriate control and at the appropriate time
- B3 Knowing how to manage the integrated crop

Teaching and Learning Methods

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.
 - C. Thinking Skills
 - C1- Instilling values and principles in the student by emphasizing the independence of the statistician when expressing his impartial opinion
 - C2- Emphasis on personal characteristics such as integrity, honesty, confidentiality and morals.
 - C3 Statement of the importance of the rules of professional conduct and its exposure to legal penalties in case of violation
 - C4- Emphasizing the importance of combating financial and administrative corruption by the regulatory bodies.

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

- D. General and Transferable Skills (other skills relevant to employability and personal development)

 - D1- Determine the type of pest
 D2- Determining the level of economic damage
 D 3- Determining the type, method and timing of the control
 - D4- Integrated pest management

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

PROGRAMME SPECIFICATION

This Programme Specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It is supported by a specification for each course that contributes to the programme.

1. Teaching Institution	University of Anbar
2. University Department/Centre	Plant Protection
3. Programme Title	Agriculture Vocabulary
4. Title of Final Award	Bachelor of Agriculture
5. Modes of Attendance offered	other
6. Accreditation	Study plan for the fourth stage
7. Other external influences	Related laws and guidelines
8. Date of production/revision of	1/6/2021
this specification	

9. Aims of the Programme

Providing students with knowledge of the nature and methods of diagnosing agricultural pests and combating them from an academic and professional point of view

Understand the nature of agricultural pests and their livelihood according to scientific standards

Understand the nature of direct and indirect economic damage caused by agricultural pests and how to deal with them according to correct applied scientific methods

Provide students with information on how to manage IPM programs of pests

Develop their awareness regarding dealing with chemical pesticides and how to dispose of their residues

10. Learning Outcomes, Teaching, Learning and Assessment Methods

- A. Knowledge and Understanding
- 1- Understand the concept of pest
- 2- Distinguish between a primary lesion and a secondary lesion
- 3- Distinguishing between types of insect, fungal, bacterial, viral and other pests.
- 4- Knowing the level of damage to the pest and when the control order is required
- 5- Knowing the appropriate type of pesticide or pest control and knowing the appropriate timing for the control
- 6-Identification of pesticides and their families and how to deal with them
- 7- Full knowledge of agricultural pest management.
 - B. Subject-specific skills
 - B1 Knowing how to diagnose the pest
 - B 2 Knowing how to determine the level of damage and the type and method of appropriate control and at the appropriate time
 - B3 Knowing how to manage the integrated crop

Teaching and Learning Methods

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.
 - C. Thinking Skills
 - C1- Instilling values and principles in the student by emphasizing the independence of the statistician when expressing his impartial opinion
 - C2- Emphasis on personal characteristics such as integrity, honesty, confidentiality and morals.
 - C3 Statement of the importance of the rules of professional conduct and its exposure to legal penalties in case of violation
 - C4- Emphasizing the importance of combating financial and administrative corruption by the regulatory bodies.

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

- D. General and Transferable Skills (other skills relevant to employability and personal development)

 - D1- Determine the type of pest
 D2- Determining the level of economic damage
 D 3- Determining the type, method and timing of the control
 - D4- Integrated pest management

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

TEMPLATE FOR COURSE SPECIFICATION

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

COURSE SPECIFICATION

This Course Specification provides a concise summary of the main features of the course and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the programme specification.

1. Teaching Institution	University of Anbar
2. University Department/Centre	Plant Protection
3. Course title/code	Plant viruses
4. Programme(s) to which it contributes	Contributes to the knowledge of the plant viruses
5. Modes of Attendance offered	attendance
6. Semester/Year	Second trimester / fourth stage
7. Number of hours tuition (total)	75
8. Date of production/revision of this Specification	2021/6/1
9. Aims of the Course	
virus, the chemical structure of virus.tea	infection, penetration, transportation and

- 10. Learning Outcomes, Teaching ,Learning and Assessment Methods
 - A- Knowledge and Understanding
 - 1 lectures include
 - A Know the importance of plant virus in plant diseases.
 - (B) Ability to diagnose viral diseases in plant
 - C Prediction of effects and results caused by viral diseases
 - 2 Worksheets
 - 3 online studies
 - 4 Scientific visits
 - 5. Duties
 - C. Subject-specific skills
 - B1 Ability to distinguish viral injury for the rest of the causes
 - B2 Know viral symptoms and distinguish the type of injury
 - B3 Methods to resist viral injurie

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

Assessment methods

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.
 - D. Thinking Skills
 - C 1- Instilling values and principles in the student by emphasizing the independence of the statistician when expressing his impartial opinion
 - C 2 Emphasis on personal characteristics such as integrity, honesty, confidentiality and morals.
 - C3 Statement of the importance of the rules of professional conduct and its exposure to legal penalties in case of violation
 - C4- Emphasizing the importance of combating financial and administrative corruption by regulatory agencies.

Teaching and Learning Methods

- A. Definition of the importance of plant diseases, especially viral
- B. Ability to diagnose viral diseases in plant
- C. Prediction of effects and results caused by viral diseases

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

- A. General and Transferable Skills (other skills relevant to employability and personal development)
 D1. Ability to determine the type of damage in the stores
 D2 - Ability to determine the type of insect
 D3 - Ability to determine the type, method and timing of control
 D4 - The ability to know and apply the storage in good management

11. Cou	rse Struct	ure			
Week	Hours	ILOs	Unit/Module or Topic Title	Teaching Method	Assessment Method
1	5	What viruses, historical profile of virus	1 - Why we study viruses2 - The importance of virus	Lecture	quiz
2	5	The nature of the virus and chemical installation	1.kinds of virus genome2. nitrogen basics in viruses	Lecture	quiz

TEMPLATE FOR PROGRAMME SPECIFICATION

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

PROGRAMME SPECIFICATION

This Programme Specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It is supported by a specification for each course that contributes to the programme.

1. Teaching Institution	University of Anbar
2. University Department/Centre	Plant Protection
3. Programme Title	Agriculture Vocabulary
4. Title of Final Award	Bachelor of Agriculture
5. Modes of Attendance offered	other
6. Accreditation	Study plan for the fourth stage
7. Other external influences	Related laws and guidelines
8. Date of production/revision of	1/6/2021
this specification	

9. Aims of the Programme

Providing students with knowledge of the nature and methods of diagnosing agricultural pests and combating them from an academic and professional point of view

Understand the nature of agricultural pests and their livelihood according to scientific standards

Understand the nature of direct and indirect economic damage caused by agricultural pests and how to deal with them according to correct applied scientific methods

Provide students with information on how to manage IPM programs of pests

Develop their awareness regarding dealing with chemical pesticides and how to dispose of their residues

10. Learning Outcomes, Teaching, Learning and Assessment Methods

- A. Knowledge and Understanding
- 1- Understand the concept of pest
- 2- Distinguish between a primary lesion and a secondary lesion
- 3- Distinguishing between types of insect, fungal, bacterial, viral and other pests.
- 4- Knowing the level of damage to the pest and when the control order is required
- 5- Knowing the appropriate type of pesticide or pest control and knowing the appropriate timing for the control
- 6-Identification of pesticides and their families and how to deal with them
- 7- Full knowledge of agricultural pest management.
 - B. Subject-specific skills
 - B1 Knowing how to diagnose the pest
 - B 2 Knowing how to determine the level of damage and the type and method of appropriate control and at the appropriate time
 - B3 Knowing how to manage the integrated crop

Teaching and Learning Methods

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.
 - C. Thinking Skills
 - C1- Instilling values and principles in the student by emphasizing the independence of the statistician when expressing his impartial opinion
 - C2- Emphasis on personal characteristics such as integrity, honesty, confidentiality and morals.
 - C3 Statement of the importance of the rules of professional conduct and its exposure to legal penalties in case of violation
 - C4- Emphasizing the importance of combating financial and administrative corruption by the regulatory bodies.

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

- D. General and Transferable Skills (other skills relevant to employability and personal development)

 - D1- Determine the type of pest
 D2- Determining the level of economic damage
 D 3- Determining the type, method and timing of the control
 - D4- Integrated pest management

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

TEMPLATE FOR COURSE SPECIFICATION

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

COURSE SPECIFICATION

This Course Specification provides a concise summary of the main features of the course and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the programme specification.

1. Teaching Institution	University of Anbar
2. University Department/Centre	Plant Protection
3. Course title/code	Nematodes\ APP3310
4. Programme(s) to which it contributes	Contributes to the knowledge of nematode pests
5. Modes of Attendance offered	attendance
6. Semester/Year	Second trimester / third stage
7. Number of hours tuition (total)	75
8. Date of production/revision of this Specification	2021/6/1
9. Aims of the Course	
The course aims to teach students what no direct and indirect economic damages to	ematodes are, nematode science, and their agricultural crops
What are the symptoms of infection and has scientific and correct ways and at the low	now to diagnose and combat it in the best

10. Learning Outcomes, Teaching ,Learning and Assessment Methode

A- Knowledge and Understanding

- A1- Understand the concept of nematology
- A2- Distinguish between the types of nematodes
- A 3- Distinguish between diseases caused by nematodes.
- A4- Knowing the level of damage to nematodes and when it requires control
- A 5- Knowing to determine the type of pesticide or appropriate control of nematodes with knowledge of the appropriate timing for the control
- A 6- Full knowledge of nematode management.

C. Subject-specific skills

- B1 Knowing how to diagnose nematodes and their diseases
- B2 Knowing how to determine the level of damage and the type and method of appropriate control at the appropriate time
- B3 Knowing how to manage the integrated crop

Teaching and Learning Methods

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

Assessment methods

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

D. Thinking Skills

- C 1- Instilling values and principles in the student by emphasizing the independence of the statistician when expressing his impartial opinion
- C 2 Emphasis on personal characteristics such as integrity, honesty, confidentiality and morals.
- C3 Statement of the importance of the rules of professional conduct and its exposure to legal penalties in case of violation
- C4- Emphasizing the importance of combating financial and administrative corruption by regulatory agencies.

Teaching and Learning Methods

- D 1- The ability to determine the type of nematode disease
- D 2- The ability to determine the level of economic damage
- D 3- The ability to determine the type, method and timing of the control
- D 4- The ability to integrated management of nematode diseases

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

- D. General and Transferable Skills (other skills relevant to employability and personal development)

 D 1- The ability to determine the type of nematode disease
 D 2- The ability to determine the level of economic damage
 D 3- The ability to determine the type, method and timing of the control

 - D 4- The ability to integrated management of nematode diseases

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

PROGRAMME SPECIFICATION

This Programme Specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It is supported by a specification for each course that contributes to the programme.

1. Teaching Institution	University of Anbar
2. University Department/Centre	Plant Protection
3. Programme Title	Agriculture Vocabulary
4. Title of Final Award	Bachelor of Agriculture
5. Modes of Attendance offered	other
6. Accreditation	Study plan for the fourth stage
7. Other external influences	Related laws and guidelines
8. Date of production/revision of	18/9/2021
this specification	

9. Aims of the Programme

Providing students with knowledge of the nature and methods of diagnosing agricultural pests and combating them from an academic and professional point of view

Understand the nature of agricultural pests and their livelihood according to scientific standards

Understand the nature of direct and indirect economic damage caused by agricultural pests and how to deal with them according to correct applied scientific methods

Provide students with information on how to manage IPM programs of pests

Develop their awareness regarding dealing with chemical pesticides and how to dispose of their residues

10. Learning Outcomes, Teaching, Learning and Assessment Methods

- A. Knowledge and Understanding
- 1- Understand the concept of pest
- 2- Distinguish between a primary lesion and a secondary lesion
- 3- Distinguishing between types of insect, fungal, bacterial, viral and other pests.
- 4- Knowing the level of damage to the pest and when the control order is required
- 5- Knowing the appropriate type of pesticide or pest control and knowing the appropriate timing for the control
- 6-Identification of pesticides and their families and how to deal with them
- 7- Full knowledge of agricultural pest management.
 - B. Subject-specific skills
 - B1 Knowing how to diagnose the pest
 - B 2 Knowing how to determine the level of damage and the type and method of appropriate control and at the appropriate time
 - B3 Knowing how to manage the integrated crop

Teaching and Learning Methods

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.
 - C. Thinking Skills
 - C1- Instilling values and principles in the student by emphasizing the independence of the statistician when expressing his impartial opinion
 - C2- Emphasis on personal characteristics such as integrity, honesty, confidentiality and morals.
 - C3 Statement of the importance of the rules of professional conduct and its exposure to legal penalties in case of violation
 - C4- Emphasizing the importance of combating financial and administrative corruption by the regulatory bodies.

Teaching and Learning Methods

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

- D. General and Transferable Skills (other skills relevant to employability and personal development)

 - D1- Determine the type of pest
 D2- Determining the level of economic damage
 D 3- Determining the type, method and timing of the control
 - D4- Integrated pest management

Teaching and Learning Methods

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

TEMPLATE FOR COURSE SPECIFICATION

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

COURSE SPECIFICATION

This Course Specification provides a concise summary of the main features of the course and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the programme specification.

1. Teaching Institution	University of Anbar
2. University Department/Centre	Plant Protection
3. Course title/code	Bee breeding \ APP3309
4. Programme(s) to which it contributes	Contributes to the knowledge of honey bee
5. Modes of Attendance offered	attendance
6. Semester/Year	Second trimester / third stage
7. Number of hours tuition (total)	75
8. Date of production/revision of this Specification	2021/9/18
9. Aims of the Course	
	al, aims to introduce students to the bee insect, what is the ect, how to deal with it correctly, and what is the benefit

- 10. Learning Outcomes, Teaching ,Learning and Assessment Methode
 - A- Knowledge and Understanding
 - A1- Understand the science of beekeeping
 - A2- Identify the types and breeds of honey bees
 - A 3- Distinguish between the different pests that infect bees.
 - A4- Knowing the economic importance of beekeeping
 - A 5- Knowing the correct and modern methods of beekeeping
 - A6 Real knowledge of practical methods for managing the apiary.
 - C. Subject-specific skills
 - B1 Knowing how a person can become a beekeeper
 - B2 Knowing the appropriate places for setting up apiaries and the economic feasibility of the project
 - B3 Knowing how to deal with the problems facing the beekeeping process

Teaching and Learning Methods

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

Assessment methods

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.
 - D. Thinking Skills
 - C 1- Instilling values and principles in the student by emphasizing the independence of the statistician when expressing his impartial opinion
 - C 2 Emphasis on personal characteristics such as integrity, honesty, confidentiality and morals.
 - C3 Statement of the importance of the rules of professional conduct and its exposure to legal penalties in case of violation
 - C4- Emphasizing the importance of combating financial and administrative corruption by regulatory agencies.

Teaching and Learning Methods

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in the supporting institutions such as the directorates of agriculture

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

- D. General and Transferable Skills (other skills relevant to employability and
 - personal development)

 D 1- The ability to distinguish between suitable and unsuitable areas for the establishment of apiaries

 D 2- The ability to identify the appropriate breeds of honey bees

 D 3- The ability to identify the types of pests and diseases that affect bees

D 4	- THE	ability	ιο	manage	Deekee	pmg	wen

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

PROGRAMME SPECIFICATION

This Programme Specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It is supported by a specification for each course that contributes to the programme.

1. Teaching Institution	University of Anbar
2. University Department/Centre	Plant Protection
3. Programme Title	Agriculture Vocabulary
4. Title of Final Award	Bachelor of Agriculture
5. Modes of Attendance offered	other
6. Accreditation	Study plan for the fourth stage
7. Other external influences	Related laws and guidelines
8. Date of production/revision of	18/9/2021
this specification	

9. Aims of the Programme

Providing students with knowledge of the nature and methods of diagnosing agricultural pests and combating them from an academic and professional point of view

Understand the nature of agricultural pests and their livelihood according to scientific standards

Understand the nature of direct and indirect economic damage caused by agricultural pests and how to deal with them according to correct applied scientific methods

Provide students with information on how to manage IPM programs of pests

Develop their awareness regarding dealing with chemical pesticides and how to dispose of their residues

10. Learning Outcomes, Teaching, Learning and Assessment Methods

- A. Knowledge and Understanding
- 1- Understand the concept of pest
- 2- Distinguish between a primary lesion and a secondary lesion
- 3- Distinguishing between types of insect, fungal, bacterial, viral and other pests.
- 4- Knowing the level of damage to the pest and when the control order is required
- 5- Knowing the appropriate type of pesticide or pest control and knowing the appropriate timing for the control
- 6-Identification of pesticides and their families and how to deal with them
- 7- Full knowledge of agricultural pest management.
 - B. Subject-specific skills
 - B1 Knowing how to diagnose the pest
 - B 2 Knowing how to determine the level of damage and the type and method of appropriate control and at the appropriate time
 - B3 Knowing how to manage the integrated crop

Teaching and Learning Methods

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.
 - C. Thinking Skills
 - C1- Instilling values and principles in the student by emphasizing the independence of the statistician when expressing his impartial opinion
 - C2- Emphasis on personal characteristics such as integrity, honesty, confidentiality and morals.
 - C3 Statement of the importance of the rules of professional conduct and its exposure to legal penalties in case of violation
 - C4- Emphasizing the importance of combating financial and administrative corruption by the regulatory bodies.

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

- D. General and Transferable Skills (other skills relevant to employability and personal development)

 - D1- Determine the type of pest
 D2- Determining the level of economic damage
 D 3- Determining the type, method and timing of the control
 - D4- Integrated pest management

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

TEMPLATE FOR COURSE SPECIFICATION

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

COURSE SPECIFICATION

This Course Specification provides a concise summary of the main features of the course and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the programme specification.

1. Teaching Institution	University of Anbar
2. University Department/Centre	Plant Protection
3. Course title/code	Field crops insects APP3410
4. Programme(s) to which it contributes	Lectures
5. Modes of Attendance offered	attendance
6. Semester/Year	Second trimester / forth stage
7. Number of hours tuition (total)	7 0
8. Date of production/revision of this Specification	2021/9/18
9. Aims of the Course	
-	oduce students to the insect pests that infect in through the phenotypic characteristics of nology.

- 10. Learning Outcomes, Teaching ,Learning and Assessment Methode
 - A- Knowledge and Understanding
 - A1- Understand the concept of entomology
 - A2- Identifying some important pests that cause economic losses
 - A3- Recognize the symptoms of infection and damage to various insect pests.
 - A4- Knowing the level of damage to insect pests and when the control order is required
 - A 5- Knowing the type of pesticide or appropriate pest control, with knowledge of the appropriate timing for the control
 - A6- Full knowledge of the management of insect pests on agricultural crops plants.
 - C. Subject-specific skills
 - B1 Knowing how to diagnose the insect species through the phenotypic characteristics or symptoms of infection
 - B2 Knowing how to determine the level of damage and the type and method of appropriate control at the appropriate time
 - B3 Knowledge of integrated pest management of a particular crop.

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.
 - D. Thinking Skills
 - C 1- Instilling values and principles in the student by emphasizing the independence of the statistician when expressing his impartial opinion
 - C 2 Emphasis on personal characteristics such as integrity, honesty, confidentiality and morals.
 - C3 Statement of the importance of the rules of professional conduct and its exposure to legal penalties in case of violation
 - C4- Emphasizing the importance of combating financial and administrative corruption by regulatory agencies.

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

- D. General and Transferable Skills (other skills relevant to employability and personal development)
 D 1- The ability to identify the types of harmful insects
 D 2- The ability to determine the level of economic damage
 D 3- The ability to determine the type, method and timing of the control

 - D4 The ability to properly manage the insect pest by relying on the best ways to control it

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

PROGRAMME SPECIFICATION

This Programme Specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It is supported by a specification for each course that contributes to the programme.

1. Teaching Institution	University of Anbar
2. University Department/Centre	Plant Protection
3. Programme Title	Agriculture Vocabulary
4. Title of Final Award	Bachelor of Agriculture
5. Modes of Attendance offered	other
6. Accreditation	Study plan for the fourth stage
7. Other external influences	Related laws and guidelines
8. Date of production/revision of	18/9/2021
this specification	

9. Aims of the Programme

Providing students with knowledge of the nature and methods of diagnosing agricultural pests and combating them from an academic and professional point of view

Understand the nature of agricultural pests and their livelihood according to scientific standards

Understand the nature of direct and indirect economic damage caused by agricultural pests and how to deal with them according to correct applied scientific methods

Provide students with information on how to manage IPM programs of pests

Develop their awareness regarding dealing with chemical pesticides and how to dispose of their residues

10. Learning Outcomes, Teaching, Learning and Assessment Methods

- A. Knowledge and Understanding
- 1- Understand the concept of pest
- 2- Distinguish between a primary lesion and a secondary lesion
- 3- Distinguishing between types of insect, fungal, bacterial, viral and other pests.
- 4- Knowing the level of damage to the pest and when the control order is required
- 5- Knowing the appropriate type of pesticide or pest control and knowing the appropriate timing for the control
- 6-Identification of pesticides and their families and how to deal with them
- 7- Full knowledge of agricultural pest management.
 - B. Subject-specific skills
- B1 Knowing how to diagnose the pest
- B 2 Knowing how to determine the level of damage and the type and method of appropriate control and at the appropriate time
- B3 Knowing how to manage the integrated crop

Teaching and Learning Methods

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.
 - C. Thinking Skills
 - C1- Instilling values and principles in the student by emphasizing the independence of the statistician when expressing his impartial opinion
 - C2- Emphasis on personal characteristics such as integrity, honesty, confidentiality and morals.
 - C3 Statement of the importance of the rules of professional conduct and its exposure to legal penalties in case of violation
 - C4- Emphasizing the importance of combating financial and administrative corruption by the regulatory bodies.

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

- D. General and Transferable Skills (other skills relevant to employability and personal development)

 - D1- Determine the type of pest
 D2- Determining the level of economic damage
 D 3- Determining the type, method and timing of the control
 - D4- Integrated pest management

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

13. Personal Development Planning

Encouraging students to achieve the highest grades in the study stages in the college so that they can be the first in order to achieve their dreams future students from completing their studies in postgraduate studies and encouraging them to enroll in postgraduate studies.

14. Admission criteria.

The average of the student in the high school, taking into account the desire of the student

15. Key sources of information about the programme

Methodological books (books, magazines, periodicals, and websites) specialized in the field of plant protection

TEMPLATE FOR COURSE SPECIFICATION

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

COURSE SPECIFICATION

This Course Specification provides a concise summary of the main features of the course and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the programme specification.

1. Teaching Institution	University of Anbar
2. University Department/Centre	Plant Protection
3. Course title/code	General entomology 1/APP3105
4. Programme(s) to which it contributes	Contributes to the knowledge of the mechanism of insect anatomy
5. Modes of Attendance offered	attendance
6. Semester/Year	First trimester / first stage
7. Number of hours tuition (total)	50
8. Date of production/revision of this Specification	2021/9/18
9. Aims of the Course	
harms and benefits of insects, to know the	the science of entomology, to identify the e parts of a typical insect, the types of ion of insects on the basis of the insect ranks

- 10. Learning Outcomes, Teaching ,Learning and Assessment Methode
 - A1- Understand the concept of entomology
 - A 2- Distinguish between the different parts of the body in insects
 - A3- Identify the structure of each part of the insect's body
 - A 4- Full knowledge of the most important benefits and harms caused by insects
 - C. Subject-specific skills
 - B1 Knowing how to harden insects and making insect models that are impregnated
 - B2 Identify and control beneficial insects and harmful insects

- 1- Adopting the method of giving lectures and linking each topic with examples from the reality of the agricultural work situation
- 2- Giving them some simple practical exercises that are discussed by the students and solved during the lecture

With the participation of all students in the section with the professor to give the material as a kind of interaction.

- 3- Training students in laboratories by conducting the necessary laboratory tests for diagnosis
- 4- Summer training in supporting institutions such as the directorates of agriculture, silos and agricultural quarantine

Assessment methods

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.
 - D. Thinking Skills
 - C 1- Instilling values and principles in the student by emphasizing the independence of the statistician when expressing his impartial opinion
 - C 2 Emphasis on personal characteristics such as integrity, honesty, confidentiality and morals.
 - C3 Statement of the importance of the rules of professional conduct and its exposure to legal penalties in case of violation
 - C4- Emphasizing the importance of combating financial and administrative corruption by regulatory agencies.

Teaching and Learning Methods

- 1 Through the participation of students in the lecture, based on their prior preparation of the subject.
- 2 Giving them an exercise as a homework and asking for it to be solved with separate papers, collected from them in the next lecture.
- 3- Giving the students a case study and dividing the students into groups to write a report about that study.
- 4- Evaluation through monthly exams.

- D. General and Transferable Skills (other skills relevant to employability and personal development)
 D 1- The ability to dissect insect pests
 D2- The ability to determine the nature of the insect's life and target it at the

 - appropriate time
