# استمارة وصف البرنامج الأكاديمي للكليات للعام الدراسي 2023 - 2024 المراحل (الثانية + الثالثة + الرابعة)

اسم الجامعة : الانبار

اسم الكلية: كلية علوم الحاسوب وتكنولوجيا المعلومات / قسم أنظمة شبكات الحاسوب

عدد الأقسام والفروع العلمية في الكلية : 4

تاريخ ملء الملف : 2024/3/6

اسم مدير شعبة ضمان الجودة والأداء الجامعي

اسم معاون العميد للشؤون العلمية

اسم عميد الكلية

# نموذج وصف البرنامج الأكاديمي

## مراجعة أداء مؤسسات التعليم العالي ((مراجعة البرنامج الأكاديمي))

يوفر وصف البرنامج الأكاديمي هذا إيجازاً مقتضباً لأهم خصائص البرنامج ومخرجات التعلم المتوقعة من الطالب تحقيقها مبرهنًا عما إذا كان قد حقق الاستفادة القصوى من الفرص المتاحة . ويصاحبه وصف لكل مقرر ضمن البرنامج

|                             |  |
|-----------------------------|--|
| 1. المؤسسة التعليمية        | جامعة الانبار  |
| 2. القسم الجامعي / المركز   | كلية علوم الحاسوب وتكنولوجيا المعلومات / قسم أنظمة شبكات الحاسوب |
| 3. اسم البرنامج الأكاديمي   | أنظمة شبكات الحاسوب  |
| 4. اسم الشهادة النهائية     | بكالوريوس أنظمة شبكات الحاسوب                                    |
| 5. النظام الدراسي           | فصلي   |
| 6. برنامج الاعتماد المعتمد  |  |
| 7. المؤثرات الخارجية الأخرى |  |
| 8. تاريخ إعداد الوصف        | 2024 / 3 / 1   |
| 9. أهداف البرنامج الأكاديمي |  |
|                             |  |
|                             |  |
|                             |  |

## 10. مخرجات التعلم المطلوبة وطرائق التعليم والتعلم والتقييم

1. المعرفة والفهم:
  - . يكون للطالب القدرة على المعرفة والفهم للمبادئ والنظريات والاساسيات في أنظمة شبكات الحاسوب.
  - . يكون للطالب القدرة على فهم المواضيع العلمية الحديثة والمتقدمة في اختصاص أنظمة شبكات الحاسوب .
  - . يكون الطالب قادر على فهم اللغات البرمجية الخاصة بدراسة اختصاصه .
  - . يكون الطالب قادر على حل المشاكل واسس تطبيقاتها .
  - . يكون الطالب قادر على فهم اسس عمل الاجهزة المخبرية التي تستخدم في مجال اختصاصه .

# Course Weekly Outline

## Course Name: Data Structures

|                           |  |            |         |         |            |
|---------------------------|--|------------|---------|---------|------------|
| <b>Course Instructor</b>  | Maha Mahmood   |            |         |         |            |
| <b>E-mail</b>             | <a href="mailto:Maha-mahmood@uoanbar.edu.iq">Maha-mahmood@uoanbar.edu.iq</a>   |            |         |         |            |
| <b>Title</b>              | Teacher  |            |         |         |            |
| <b>Course Coordinator</b> | Maha Mahmood   |            |         |         |            |
| <b>Course Objective</b>   | <p>1- Learning different data structures</p> <p>2- Understand why this data structure is better than the other one.</p> <p>3- Learning how to choose the best data structure for your algorithm.</p> <p>4- learn how to deal with your problem, building its algorithm and fitting the best data structures to it.</p>   |            |         |         |            |
| <b>Course Description</b> | <p>This course covers all data structure types. It starts with defining algorithms and their complexity from the time and space prospection. Then, a list of data structure and their description is presented. The course describes every data structure in detail. In addition to that, it gives the reason to why we need this data structure and where to use it. This course includes many projects that give more understanding to the data structure studied. These projects talks about real life problems that we ask student to use one of the data structure that has been presented in the course to solve it.</p> |            |         |         |            |
| <b>Textbook</b>           | Introduction to Algorithm, third Edition, Thomas H. Cormen<br>Algorithms, fourth edition, Robert Sedgewick and Kevin Wayne   |            |         |         |            |
| <b>References</b>         | Introduction to Algorithm, third Edition, Thomas H. Cormen<br>Algorithms, fourth edition, Robert Sedgewick and Kevin Wayne   |            |         |         |            |
| <b>Course Assessments</b> | Term Tests   | Laboratory | Quizzes | Project | Final Exam |
|                           | %20  | %10        | %5      | %15     | %50        |
| <b>General Notes</b>      |  |            |         |         |            |

## Course Weekly Outline

| Week | Date | Topics Covered  | Lab. Experiment Assignments               | Notes |
|------|------|---|---|-------|
| 1    |      | Introduction for data structure Introduction                    |   |       |
| 2    |      | Learn the basic principles                                      |   |       |
| 3    |      | Learn the array in different domination Array<br>Data structure | Accountant application<br>using arrays    |       |
| 4    |      | Learn stack and its operation                                   |   |       |
| 5    |      | Learn one of the stack application                              | Student information<br>system using stack |       |
| 6    |      | Learn Queue and its operation                                   |   |       |
| 7    |      | . Learn circular Queue and its operation                        |   |       |
| 8    |      | Review for Pointer &Structure                                   |   |       |
| 9    |      | exam  |   |       |
| 10   |      | Learn Linked list representation                                |   |       |
| 11   |      | Learn Linked list operations                                    |   |       |
| 12   |      | Learn Doubly Linked list representation                         |   |       |
| 13   |      | Learn Doubly Linked list operations                             |   |       |
| 14   |      | second semester exam  |   |       |
| 15   |      | review  |   |       |

## Department of Computer Networks Systems

### Practical Course Description

**Course Title:** Advance mathematics

**Course Code:**

**Semester:** 1 st semester

**Level:** B.Sc.

**Class:** 2 nd

**Academic Year:** 2022/2021

**Course Instructor:** Learning Outcomes, Teaching ,Learning and Assessment Method

**Academic status:** Assistant teacher

**Place of work:** Computer Networks systems Department

**Credit Hours:** 45

**Instructor Office Hours:**

**E-mail (Official):** taiseer.a.yaseen@uoanbar.edu.iq

**Mobile Number:** 07903468936

Ministry of Higher Education & Scientific Research

University of Anbar

College of Computer Science  
and Information Technology

Computer Networks Systems Department

وَزَارَةُ التَّعْلِيمِ العَالِيِّ وَالبَحْثِ العِلْمِيِّ  
جَامِعَةُ الأنْبَارِ  
كُلِيَّةُ عِلْمِ الحَاسِبِ وَتِكْنُولُوجِيَا العِلْمِ  
قِسْمُ انْظِمَةِ شَبَكَاتِ الحَاسِبِ

كُلِيَّةُ عِلْمِ الحَاسِبِ وَتِكْنُولُوجِيَا العِلْمِ

## Objectives:

### 1. Course Description:

2. **Methods of Teaching:** Teaching and Learning Methods By Solving many exercises

3. **Assessment Method:** 5% homework, 10% oral exam, 5% quiz, 20 mid exam, 60% final exam

4. **Recommended Text Books and References:** Thomas, G. Calculus and Analytic Geometry, 5<sup>th</sup> Edition, Addison Wesley, 1999.

A. **Textbook:**

B. **Other References:**

## Lecture Schedule:

| Weeks   | Topics                                |
|---------|---------------------------------------|
| Week 1  | Introduction to differential equation |
| Week 2  | Types of differential equation        |
| Week 3  | Linear and Nonlinear DE               |
| Week 4  | Types of First Order and First Degree |
| Week 5  | Variable Separable Equation           |
| Week 6  | Leibnitz's (linear) Equation          |
| Week 7  | Bernoulli's Differential Equation     |
| Week 8  | Exact Differential Equation           |
|         | <b>Midterm Exam</b>                   |
| Week 9  | Non Exact Differential Equation       |
| Week 10 | Homogeneous and Non Homogeneous DE    |

|                           |  |            |         |         |            |
|---------------------------|--|------------|---------|---------|------------|
| <b>Course Instructor</b>  | Hussam Jasim Ali   |            |         |         |            |
| <b>E-mail</b>             | hssjali@uoanbar.edu.iq   |            |         |         |            |
| <b>Title</b>              | Assistant Lecturer   |            |         |         |            |
| <b>Course Coordinator</b> |  |            |         |         |            |
| <b>Course Objective</b>   | After the students complete the course they will be able to realize the digital system principles, design, simplify, and analyze combinational logic circuits, and also Design and analyze sequential logic circuits, counters, and shifting logic circuits. |            |         |         |            |
| <b>Course Description</b> |  |            |         |         |            |
| <b>Textbook</b>           | Digital Electronics<br>Principles, Devices and Applications<br>(Anil K. Maini)   |            |         |         |            |
| <b>References</b>         | Digital electronics : principles, devices, and applications / Anil Kumar Maini. ISBN 978-0-470-03214-5   |            |         |         |            |
| <b>Course Assessments</b> | Term Tests   | Laboratory | Quizzes | Project | Final Exam |
|                           | 30   | 15         | 5       |         | 50         |
| <b>General Notes</b>      | -  |            |         |         |            |

### Course Weekly Outline

| Week | Date | Topics Covered   | Lab. Experiment Assignments   | Notes |
|------|------|--|-------------------------------|-------|
| 1    |      | Analog ,Digital, Analog vs Digital, Electronics Components (Resistor, Diode, Transistor, Capacitor, Relay, Led), Number systems (decimal, binary, octal, hexadecimal) , Logic gates (AND, OR, NOT, NAND, NOR, XOR, XNOR), Binary Codes (Binary Coded Decimal, Gray Code, Alphanumeric Codes), Logic Families | Define Logic gates            |       |
| 2    |      | Boolean, Demorgan's theorem , Simplification Techniques  | Design                        |       |
| 3    |      | Karnaugh maps (2-variables, 3-variables, 4-variables)  | Design                        |       |
| 4    |      | Arithmetic operations (adder, parallel binary adder, Subtractor, decoder, encoder, multiplexer, DEMultiplexer, comparator, cod, conversion)  | Implement Arithmetic Circuits |       |
| 5    |      | Arithmetic operations (adder, parallel binary adder, Subtractor, decoder, encoder, multiplexer, DEMultiplexer, comparator, cod, conversion)  | Implement Arithmetic Circuits |       |
| 6    |      | Flip-flops(SR latch, D latch, T-latch, J-K F.F, edge triggered, conversion from one type to another)   | Implement Circuits            |       |
| 7    |      | Counters (asynchronous, synchronous, decade, up/down, cascade, counter decoding)   | Implement Counters            |       |
| 8    |      | Counters (asynchronous, synchronous, decade, up/down, cascade, counter decoding)   | Implement Counters            |       |
| 9    |      | Shift-registers (serial in/serial out, serial in/parallel out, parallel in/serial out, parallel in/parallel out, bidirectional , shift register counter (Johnson counter, Ring counter))   | Implement Counters            |       |
| 10   |      | Multivibrators (definition, astable, bistable, monostable, 555 timer)  | Design Timer                  |       |
| 11   |      | A / D and D/A convertors (R /2 R DAC, R/2n R DAC, flash ADC, tacking ADC, slope ADC, successive approximation ADC, digital ramp ADC, delta sigma ADC)  | Design Converter              |       |
| 12   |      | A / D and D/A convertors (R /2 R DAC, R/2n R DAC, flash ADC, tacking ADC, slope ADC, successive approximation ADC, digital ramp ADC, delta sigma ADC)  | Design Converter              |       |
| 13   |      | Microcontrollers atmega , introduction to arduino  |                               |       |
| 14   |      | Arduino programming  |                               |       |
| 15   |      | Arduino programming  |                               |       |

## Department of Computer Networks Systems

### Course Description Form

Course Title: Microprocessors.

Course Code:

Semester: I

Level: B.Sc.

Class: 2<sup>nd</sup>

Academic Year: 2022/2021

Course Instructor: Fouad H. Awad

Academic status: Teacher

Place of work: college of computer science and information technology

Credit Hours: Sunday (8:30- 10:30) and Thursday (11:30 - 2:00)

Instructor Office Hours: Sunday and Thursday.

E-mail (Official): Fouad.hammedi@uoanbar.edu.iq

Mobile Number:07813533384

## Lecture Schedule:

| Weeks          | Topics   |
|----------------|--|
| <b>Week 1</b>  | Introduction to computer system ,Von Neumann and Harvard architectures , comparison between Microprocessor and Microcontroller .                                   |
| <b>Week 2</b>  | Memory hierarchy ,cache memory principle ,Locality of references ,types of locality .  |
| <b>Week 3</b>  | Cache and main memory organizations , Memory performance measures , Relation between cache memory and active program portion .                                     |
| <b>Week 4</b>  | Memory management unit , Replacement process , Cache mapping techniques , Direct mapping , Fully associative mapping , Set associative mapping .                   |
| <b>Week 5</b>  | Comparison between cache memory mapping techniques , Effect of cache on overall performance , Main and cache memory hardware types(DRAM,SRAM)                      |
| <b>Week 6</b>  | Virtual memory aim , page table , Virtual address to physical address translation technique with examples , TLB .  |
| <b>Week 7</b>  | Architecture of 80386 , signals description of 80386 , Buses masters and slaves , 80386 memory model spaces , Logical and physical addresses with paging .         |
| <b>Week 8</b>  | Hardware organization of memory address space , 8086 registers overview , Real mode and Protected mode in 80286 , Segment selector .                               |
|                | <b>Midterm Exam</b>  |
| <b>Week 9</b>  | Offset memory address , Instruction pointer register , Real mode address generation .  |
| <b>Week 10</b> | Calculation of physical address .  |
| <b>Week 11</b> | Protected mode address generation , segment register , Segment selectors and descriptors .   |
| <b>Week 12</b> |  |
| <b>Week 13</b> | Descriptors (Local ,global , number of it ) , Protection of OS authorization using RPL register , 80386\80486 and Pentium Processors Program Invisible Registers . |
| <b>Week 14</b> | Bus cycles of 80386 , 80386 bus states , Pipelined and non pipelined machine bus cycles .  |
| <b>Week 15</b> | BIU ,EU ,Coprocesor , Operand storing locations , addressing modes .   |

## Lecture Schedule:

| Weeks               | Topics  |
|---------------------|---|
| Week 1              | Python Fundamental: Introduction, Variables, Comments, Python Data Types                |
| Week 2              | Python Fundamental: Operators, Python Conditions and If statements, Python Loops        |
| Week 3              | Python Fundamental: Functions, Arrays   |
| Week 4              | Python - Object Oriented Programming: Introduction to Class Fundamentals                |
| Week 5              | Python - Object Oriented Programming: Closer Look at Class Member Access                |
| Week 6              | Python - Object Oriented Programming: Constructors and Destructors                      |
| Week 7              | Python - Object Oriented Programming: Creating Inline Functions Inside a Class (Lambda) |
| Week 8              | Python - Object Oriented Programming: Arrays of Objects (Classes)                       |
| <b>Midterm Exam</b> |   |
| Week 9              | Python - Object Oriented Programming: Pointers to Objects (Classes)                     |
| Week 10             | Python - Object Oriented Programming: Friend Functions                                  |
| Week 11             | Python - Object Oriented Programming: Overloading Constructors                          |
| Week 12             | Python - Object Oriented Programming: Passing Objects (Classes) to Functions            |
| Week 13             | Python - Object Oriented Programming: Returning Objects (classes ) From Functions       |
| Week 14             | Python - Object Oriented Programming: Extra Examples                                    |
| Week 15             | Python - Object Oriented Programming: Final Exam  |

## نموذج وصف المقرر

### وصف المقرر

يوفر وصف المقرر هذا إيجازاً مقتضياً لأهم خصائص المقرر ومخرجات التعلم المتوقعة من الطالب تحقيقها مبرهناتاً عما إذا كان قد حقق الاستفادة القصوى من فرص التعلم المتاحة. ولا بد من الربط بينها وبين وصف البرنامج؛

| الخامس عشر      |         |                        |   | نظري          | امتحان شهري            |

# TEMPLATE FOR COURSE SPECIFICATION

## HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

### COURSE SPECIFICATION

This Course Specification provides a concise summary of the main features of the course and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the programme specification.

|  |   |
|--|---|
| 1. Teaching Institution  | University of Anbar                               |
| 2. University Department/Centre  | University of Anbar / Computer Networks System    |
| 3. Course title/code   | 1 <sup>st</sup>                                   |
| 4. Programme(s) to which it contributes  | Information theory and coding                     |
| 5. Modes of Attendance offered   | The electronic attendance of the theoretical side |
| 6. Semester/Year   | 2021-2022   |
| 7. Number of hours tuition (total)   | 2 for theoretical in week                         |
| 8. Date of production/revision of this specification   |   |
| 9. Aims of the Course  |   |
| Providing the student with basic information about the applications of information theory<br>Studying the relationship between probability theory and information theory<br>Studying how to measure the amount of information in the information carrier<br>Studying how to compress the volume of information<br>Studying how to protect information during its transmission<br>Studying the channel capacity calculations that carry information<br>Studying how to distinguish between regular and irregular symbols<br>Studying ways to correct erroneous information during transmission at the receiving end |   |

| 11. Course Structure |       |   |  |                      |  |
|----------------------|-------|---|--|----------------------|--|
| Week                 | Hours | ILOs  | Unit/Module or Topic Title                 | Teaching Method      | Assessment Method  |
| 1                    | 2     | The relationship of probability to information theory                       | probability                                | Theoretical lectures | Daily exams, surprise exams, documented exams, semester exams, final exams, oral questions and discussions during lectures, homework |
| 2                    | 2     | Distinguish between types of information sources                            | Information Sources                        |                      |  |
| 3                    | 2     | Learn the best ways to compress information                                 | Encryption methods for information sources |                      |  |
| 4                    | 2     | Distinguish between the types of information transmission channels          | information channels                       |                      |  |
| 5                    | 2     | Knowing the channel capacity and how it is calculated                       | channel capacity                           |                      |  |
| 6                    | 2     | Knowing the methods of sending information after changing its codes         | Encryption of information channels         |                      |  |
| 7                    | 2     | Knowing the methods of retrieving information through the encryption method | Recover one-mistake information            |                      |  |
| 8                    | 2     | Knowing the methods of retrieving information through the encryption method | Multiple Error Information Recovery        |                      |  |
| 9                    | 2     | Advanced methods for recovering false information                           | Wrong information recovery                 |                      |  |

### Course Description Form

**Course Title: Object Oriented Program 2**

**Course Code:**

**Semester: II**

**Level: B.Sc.**

**Class: Second**

**Academic Year: 2022/2021**

**Course Instructor: Dr. Sumaya Abdulla Hamad**

**Academic status: Instructor**

**Place of work: College of Computer Science / Computer Networks  
System Department**

**Credit Hours: Seven (7)**

**Instructor Office Hours: Ten (10)**

**E-mail (Official): sumayah.hamad@uoanbar.edu.iq**

**Mobile Number: 07807987722**

## Objectives:

- The student's acquisition of the concept of entity programming, classes, and objects, and how to deal with them.
- Clarify the concept of classes, what are the functions and properties of them, and the objects of each class.
- Giving the student experience in dealing with objects and classes and the distribution of properties and functions.
- The study of structured programming, entity programming and what is known as object-oriented programming, knowledge of injunctions and functions to prepare the student to know how to write a set of commands, knowing what are injunctions, how to build classes and objects, what the class has of properties and functions, how to build several classes and several objects, and how properties are inherited between them.

### 1. Course Description:

#### A: Knowledge and Understanding

- A1. Gain the ability and skill to distinguish and deal with program instructions and functions of entity programming.
- A2. Acquire the skill of distinguishing between objects, classes and functions and linking them.
- A3. Dealing with the attributes and characteristics of each class and programming functions.

#### B. Subject-specific skills

- B1. summer training
- B2. Scientific Reports

#### C. Thinking Skills

- C1. Develop the student's ability to work on the duties and deliver them on time.
- C2. Programmatically analyze the problem and find solutions based on the expected results.
- C3. Develop the student's ability to dialogue and discussion.

#### D. General and Transferable Skills (other skills relevant to employability and personal development)

- D1. Develop the student's ability to deal with technical means.
- D2. Develop the student's ability to deal with the Internet.
- D3. Develop the student's ability to deal with multiple media.
- D4. Develop the student's ability to dialogue and discussion.

## 2. Methods of Teaching:

- Management of the lecture in an applied manner linked to the reality of daily life to attract the student to the topic of the lesson without moving away from the core of the topic so that the material is flexible and capable of understanding and analysis.
- Assigning the student some group activities and duties.
- Allocating a percentage of the grade for daily assignments and tests.
- Sudden daily and continuous weekly tests.
- Exercises and activities in the classroom.
- Guide students to some websites to benefit from them.

## 3. Assessment Method:

- Active participation in the classroom is evidence of the student's commitment and responsibility.
- Commitment to the deadline in submitting assignments and research.
- The quarterly and final exams express commitment and cognitive and skill achievement.
- Presentation of activities

| Term Tests | Laboratory | Quizzes | Project / Activity | Final Exam |
|------------|------------|---------|--------------------|------------|
| 25 %       | 15 %       | 5 %     | 5 %                | 50 %       |

## 4. Recommended Text Books and References:

- Textbook:** Object-Oriented Programming in Python Documentation, Release 1, University of Cape Town and individual contributors, Nov 15, 2017
- Other References:** pdf files lectures , Internet Resources.

## Lecture Schedule:

| Weeks               | Topics   |
|---------------------|--|
| Week 1              | Python - Object Oriented Programming: Introduction to Operator Overloading                         |
| Week 2              | Python - Object Oriented Programming: Operator Overloading Using Member Functions                  |
| Week 3              | Python - Object Oriented Programming: Base Class Access Control                                    |
| Week 4              | Python - Object Oriented Programming: Using Public, Protected, Private Members                     |
| Week 5              | Python - Object Oriented Programming: Introducing Inheritance                                      |
| Week 6              | Python - Object Oriented Programming: Inheriting Multiple Base Classes                             |
| Week 7              | Python - Object Oriented Programming: Constructors, Destructors, and Inheritance                   |
| Week 8              | Python - Object Oriented Programming: Passing Parameters to Base Class Constructors                |
| <b>Midterm Exam</b> |  |
| Week 9              | Python - Object Oriented Programming: Using Public, Protected, Private Members of the Parent Class |
| Week 10             | Python - Object Oriented Programming: Method Overriding in Python Inheritance                      |
| Week 11             | Python - Object Oriented Programming: Composition in Python  |
| Week 12             | Python - Object Oriented Programming: Multilevel Inheritance                                       |
| Week 13             | Python - Object Oriented Programming: Hierarchical and Hybrid Inheritance                          |
| Week 14             | Python - Object Oriented Programming: Polymorphism   |
| Week 15             | Python - Object Oriented Programming: Final Exam   |

## Department of Computer Networks Systems

### Course Description Form

Course Title: English Language

Course Code:

Semester: II

Level: B.Sc.

Class: Second Year

Academic Year: 2022/2021

Course Instructor: Dr. Wesam Mohammed Jasim

Academic status: Prof.

Place of work: Computer Science Department

Credit Hours: 2

Instructor Office Hours:

E-mail (Official): [co.wesam.jasim@uoanbar.edu.iq](mailto:co.wesam.jasim@uoanbar.edu.iq)

Mobile Number: 07824026570

## Objectives:

- 1- Demonstrate an understanding of the objectives and difficulties of English language.
- 2- Demonstrate an understanding of its grammar.
- 3- Demonstrate an understanding of fundamental principles of using the types of verbs in sentences.
- 4- Demonstrate an understanding of English language writing.
- 5- Demonstrate an understanding of English language speaking.

## Course Description:

1. Overview of English language.
2. Verb types of English language.
3. Used of verbs in English language.
4. Writing a short answers and sentences.

## Methods of Teaching:

- 1- Lectures.
- 2- Assignments.

## Assessment Method:

|                             |       |
|-----------------------------|-------|
| Midterm Examination         | 20 %  |
| Quizzes                     | 10 %  |
| Attendances                 | 5 %   |
| Course Work and Assignments | 5 %   |
| Final Examination           | 60 %  |
| <hr/>                       |       |
| Total                       | 100 % |

### Lecture Schedule:

| Weeks               | Topics  |
|---------------------|---|
| Week 1              | Unit 1 ; Getting to Know you; Grammar                           |
| Week 2              | Unit 1 ; Getting to Know you; Vocabulary; Everyday English      |
| Week 3              | Unit 2 ; The Way We Live; Grammar                               |
| Week 4              | Unit 2 ; The Way We Live; Vocabulary; Everyday English          |
| Week 5              | Unit 3 ; It All Went Wrong; Grammar                             |
| Week 6              | Unit 3 ; It All Went Wrong; Vocabulary; Everyday English        |
| Week 7              | Unit 4 ; Let Us Go Shopping; Grammar                            |
| Week 8              | Unit 4 ; Let Us Go Shopping; Vocabulary; Everyday English       |
| <b>Midterm Exam</b> |   |
| Week 9              | Unit 5 ; What Do You Want To Do; Grammar                        |
| Week 10             | Unit 5 ; What Do You Want To Do; Vocabulary; Everyday English   |
| Week 11             | Unit 6 ; Tell Me What's it Like; Grammar                        |
| Week 12             | Unit 6 ; Tell Me What's it Like; Vocabulary; Everyday English   |
| Week 13             | Unit 7 ; Famous Couples; Grammar                                |
| Week 14             | Unit 7 ; Famous Couples; Vocabulary; Everyday English           |
| Week 15             | Unit 8 ; Do's and Don'ts; Grammar; Vocabulary; Everyday English |

## Lecture Schedule:

| Weeks   | Topics  |
|---------|---|
| Week 1  | Introduction to Database Management System                    |
| Week 2  | View of Data, Data Abstraction, Instances and Schemas         |
| Week 3  | Data Models, Database Architecture                            |
| Week 4  | Database Languages: DDL, DML                                  |
| Week 5  | Conceptual Database Design - Entity Relationship(ER) Modeling |
| Week 6  | Relational Data Model, Type of Keys                           |
| Week 7  | Relational Algebra  |
| Week 8  | Relational calculus, Tuple Relational Calculus, Examples      |
|         | <b>Midterm Exam</b>   |
| Week 9  | Domain Relational Calculus, Examples of DRC Queries           |
| Week 10 | SQL, the form of a basic SQL query + Examples (1)             |
| Week 11 | SQL, the form of a basic SQL query + Examples (2)             |
| Week 12 | Schema Refinement   |
| Week 13 | Decompositions  |
| Week 14 | Functional Dependencies                                       |
| Week 15 | Normalization   |

## Lecture Schedule:

| Weeks               | Topics   |
|---------------------|--|
| <b>Week 1</b>       | PHP Fundamentals: What is PHP?, What is a Scripting Language?, PHP Syntax, Why use PHP?, What is PHP used for & Market share, PHP File Extensions, |
| <b>Week 2</b>       | PHP Fundamentals: PHP Data Types, Variables, Constant, Operators, PHP Comments   |
| <b>Week 3</b>       | PHP Fundamentals: PHP Array: Associative, Multidimensional   |
| <b>Week 4</b>       | PHP Logic: PHP Control Structures: If else, Switch Case  |
| <b>Week 5</b>       | PHP Logic: PHP Loop: For, ForEach, While, Do While   |
| <b>Week 6</b>       | PHP Logic: PHP Strings: PHP String Functions Explained with Examples   |
| <b>Week 7</b>       | PHP Logic: PHP Function: Built in, String, Numeric with Examples   |
| <b>Week 8</b>       | PHP Advance: PHP Date() & Time Function: How to Get Current Timestamp?   |
| <b>Midterm Exam</b> |  |
| <b>Week 9</b>       | PHP Logic: PHP preg_match(): Regular Expressions (Regex)   |
| <b>Week 10</b>      | PHP Logic: PHP Registration Form using GET, POST Methods with Example  |
| <b>Week 11</b>      | PHP Logic: PHP Session & PHP Cookies with Example  |
| <b>Week 12</b>      | PHP Logic: PHP File() Handling & Functions   |
| <b>Week 13</b>      | PHP Advance: How to Send Email using PHP mail() Function   |
| <b>Week 14</b>      | PHP Advance: PHP MySQLi Functions: mysqli_query, mysqli_connect, mysqli_fetch_array  |
| <b>Week 15</b>      | PHP Advance: PHP Object Oriented Programming (OOPs) concept Tutorial with Example  |

# Course Weekly Outline

## Course Name: Digital Signal Processing

|                           |  |            |         |         |            |
|---------------------------|--|------------|---------|---------|------------|
| <b>Course Instructor</b>  | Dr. Omar Munthir Al Okashi   |            |         |         |            |
| <b>E-mail</b>             | <a href="mailto:Omar.alokashi@uoanabr.edu.iq">Omar.alokashi@uoanabr.edu.iq</a>   |            |         |         |            |
| <b>Title</b>              | Ass. Prof  |            |         |         |            |
| <b>Course Coordinator</b> |  |            |         |         |            |
| <b>Course Objective</b>   | The purpose of this course is to provide an overview of digital signal processing and describe the signal and converting from analog to digital. It will also provide knowledge of digital filter. |            |         |         |            |
| <b>Course Description</b> | This course introduce the main concepts of signal processing starting from conversion to digital and arriving to filtering.  |            |         |         |            |
| <b>Textbook</b>           | Digital Signal Processing Fundamentals and Applications, Li Tan  |            |         |         |            |
| <b>References</b>         | The scientist and engineer's guide to Digital Signal Processing, Steven W. Smith   |            |         |         |            |
| <b>Course Assessments</b> | Term Tests   | Laboratory | Quizzes | Project | Final Exam |
|                           | 35   | -          | 5       | -       | 60         |
| <b>General Notes</b>      | -  |            |         |         |            |

### Course Weekly Outline

| Week | Date  | Topics Covered                        | Lab. Experiment Assignments | Notes |
|------|-------|---------------------------------------|-----------------------------|-------|
| 1    | 4-10  | Introduction to DSP                   |                             |       |
| 2    | 11-10 | Signal sampling and quantization      |                             |       |
| 3    | 18-10 | Conversion from digital to analog     |                             |       |
| 4    | 25-10 | Digital signals and system            |                             |       |
| 5    | 1-11  | Exam                                  |                             |       |
| 6    | 8-11  | Linear Time-Invariant, Causal Systems |                             |       |
| 7    | 15-11 | Signal manipulation                   |                             |       |
| 8    | 22-11 | Format of difference equation         |                             |       |
| 9    | 29-11 | Digital Convolution                   |                             |       |
| 10   | 6-12  | Exam                                  |                             |       |
| 11   | 13-12 | Methods of Convolution                |                             |       |
| 12   | 20-12 | Fourier Transform                     |                             |       |
| 13   | 27-12 | Fourier Transform                     |                             |       |
| 14   | 3-01  | Digital filters                       |                             |       |
| 15   | 10-01 | Exam                                  |                             |       |

## Lecture Schedule:

| Weeks   | Topics  |
|---------|---|
| Week 1  | Unit 1 ; It's a wonderful world; Grammar                      |
| Week 2  | Unit 1 ; It's a wonderful world; Vocabulary; Everyday English |
| Week 3  | Unit 2 ; Get Happy; Grammar                                   |
| Week 4  | Unit 2 ; Get Happy; Vocabulary; Everyday English              |
| Week 5  | Unit 3 ; Telling tales; Grammar                               |
| Week 6  | Unit 3 ; Telling tales; Vocabulary; Everyday English          |
| Week 7  | Unit 4 ; Doing the right thing; Grammar                       |
| Week 8  | Unit 4 ; Doing the right thing; Vocabulary; Everyday English  |
|         | <b>Midterm Exam</b>   |
| Week 9  | Unit 5 ; On the move; Grammar                                 |
| Week 10 | Unit 5 ; On the move; Vocabulary; Everyday English            |
| Week 11 | Unit 6 ; I just love it; Grammar                              |
| Week 12 | Unit 6 ; I just love it; Vocabulary; Everyday English         |
| Week 13 | Unit 7 ; The world of work; Grammar                           |
| Week 14 | Unit 7 ; The world of work; Vocabulary; Everyday English      |
| Week 15 | Unit 8 ; Just imagine; Grammar; Vocabulary; Everyday English  |

# TEMPLATE FOR COURSE SPECIFICATION

## HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

### COURSE SPECIFICATION

This Course Specification provides a concise summary of the main features of the course and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the programme specification.

|   |   |
|---|---|
| 1. Teaching Institution   | Ministry of Higher Education and Scientific Research/University of Anbar                        |
| 2. University Department/Centre   | College of Computer Science and Information Technology  |
| 3. Course title/code  | Multimedia Basics   |
| 4. Programme (s) to which it contributes  |   |
| 5. Modes of Attendance offered  | The electronic attendance of the theoretical side and the actual presence of the practical side |
| 6. Semester/Year  | Second Semester - Academic Year 2022/2021   |
| 7. Number of hours tuition (total)  | 45  |
| 8. Date of production/revision of this Specification  |   |
| 9. Aims of the Course   |   |
| a. This course covers the theoretical basis for the Department of Computer Networks on the part of the media (text, draw, Image, audio and video)<br>b. To know information about each type of media (input, processing, and output).<br>c. To understand how to convert arguments from the entered form to the form that is processed by the computer, as well as the types of formulas in which it is stored in the computer.<br>d. The student understands the foundations on which media is pressured and its benefits. |   |

# Course Weekly Outline

## Course Name: Digital Signal Processing II

|                           |  |            |         |         |            |
|---------------------------|--|------------|---------|---------|------------|
| <b>Course Instructor</b>  | Dr. Omar Munthir Al Okashi   |            |         |         |            |
| <b>E-mail</b>             | <a href="mailto:Omar.alokashi@uoanabr.edu.iq">Omar.alokashi@uoanabr.edu.iq</a>   |            |         |         |            |
| <b>Title</b>              | Ass. Prof  |            |         |         |            |
| <b>Course Coordinator</b> |  |            |         |         |            |
| <b>Course Objective</b>   | The purpose of the course is to introduce principles of computer organization and the basic architectural concepts. It begins with basic organization, design, of a simple digital computer and introduces simple register transfer language to specify various computer operations.                   |            |         |         |            |
| <b>Course Description</b> | This course aims to provide a strong foundation for students to understand the modern eras of computer architecture. The course is structured around different main subject of computer architecture. Those subjects include different parts of computer such as memory, CPU and input output devices. |            |         |         |            |
| <b>Textbook</b>           | The essential of computer architecture and organization, 5 <sup>th</sup> edition, Linda Null   |            |         |         |            |
| <b>References</b>         | The essential of computer architecture and organization, 5 <sup>th</sup> edition, Linda Null   |            |         |         |            |
| <b>Course Assessments</b> | Term Tests   | Laboratory | Quizzes | Project | Final Exam |
|                           | 35   | -          | 5       | -       | 60         |
| <b>General Notes</b>      | -  |            |         |         |            |

| Week | Date  | Topics Covered  | Lab. Experiment Assignments | Notes |
|------|-------|---|-----------------------------|-------|
| 1    | 21-02 | Introduction to computer components and historical review |                             |       |
| 2    | 28-02 | Data representation in computer system                    |                             |       |
| 3    | 07-03 | Error detection and correction                            |                             |       |
| 4    | 14-03 | Boolean algebra and digital logic                         |                             |       |
| 5    | 21-03 | Exam  |                             |       |
| 6    | 28-03 | MARIE: an introduction to simple computer                 |                             |       |
| 7    | 04-04 | Instruction Set Architecture                              |                             |       |
| 8    | 11-04 | Memory (1)  |                             |       |
| 9    | 18-04 | Memory (2)  |                             |       |
| 10   | 25-04 | Exam  |                             |       |
| 11   | 02-05 | Input/output storage system                               |                             |       |
| 12   | 09-05 | System Software   |                             |       |
| 13   | 16-05 | Performance Measurement and Analysis                      |                             |       |
| 14   | 23-05 | Embedded System   |                             |       |
| 15   | 30-05 | Exam  |                             |       |

## Lecture Schedule:

| Weeks               | Topics   |
|---------------------|--|
| Week 1              | <ul style="list-style-type: none"><li>• Network and Protocol: Definition and Overview</li></ul>  |
| Week 2              | <ul style="list-style-type: none"><li>• Protocols &amp; Services</li></ul>   |
| Week 3              | <ul style="list-style-type: none"><li>• OSI Network Architecture Seven Layers Model</li><li>• TCP/IP Four Layers Architecture Model</li><li>• Network Architecture Models: IBM SNA</li></ul> |
| Week 4              | <ul style="list-style-type: none"><li>• Application Layer Protocols</li><li>• BOOTP: Bootstrap Protocol</li><li>• DHCP: Dynamic Host Configuration Protocol</li></ul>                        |
| Week 5              | <ul style="list-style-type: none"><li>• DNS: Domain Name System (Service) protocol</li><li>• FTP: File Transfer Protocol</li><li>• HTTP: Hypertext Transfer Protocol</li></ul>               |
| Week 6              | <ul style="list-style-type: none"><li>• NTP: Network Time Protocol</li><li>• RMON: Remote Monitoring MIBs (RMON1 and RMON2)</li><li>• SMTP: Simple Mail Transfer Protocol</li></ul>          |
| Week 7              | <ul style="list-style-type: none"><li>• Presentation Layer Protocols</li><li>• LPP: Lightweight Presentation Protocol</li></ul>  |
| Week 8              | <ul style="list-style-type: none"><li>• Session Layer Protocols</li><li>• RPC: Remote Procedure Call protocol</li></ul>  |
| <b>Midterm Exam</b> |  |
| Week 9              | <ul style="list-style-type: none"><li>• Transport Layer Protocols</li><li>• RDP: Reliable Data Protocol</li></ul>  |
| Week 10             | <ul style="list-style-type: none"><li>• TCP: Transmission Control Protocol</li><li>• UDP: User Datagram Protocol</li></ul>   |
| Week 11             | <ul style="list-style-type: none"><li>• Network Layer Protocols</li><li>• IP: Internet Protocol (IPv4)</li></ul>   |

## **Department of Computer Networks Systems**

### **Course Description Form**

**Course Title: Web Application Development I**

**Course Code:**

**Semester: I**

**Level: B.Sc.**

**Class: 4<sup>th</sup>**

**Academic Year: 2022/2021**

**Course Instructor: Prof. Dr. Ali Makki Sagheer**

**Academic status: Professor**

**Place of work: College of Computer Science and Information Technology**

**Credit Hours: 3 hours**

**Instructor Office Hours: 3 hours**

**E-mail (Official): ali\_makki@uoanbar.edu.iq**

**Mobile Number: +964(0)7700073940**

## Objectives:

### 1. Course Description:

2. ASP Net is a web application framework developed and marketed by Microsoft to enable developers to construct dynamic websites. It permits you to utilize a full-featured shows language such as C# or VB.NET to build internet applications easily. ASP.NET is a free web framework for developing Web sites and Web applications using HTML, CSS and JavaScript. Moreover, it is a technology for developing, deploying, and running Web applications. ASP.NET is a part of the Microsoft .NET Framework, so all .NET Framework features are available to ASP.NET applications. That means, when you developing ASP.NET applications you have access to classes in the .NET Framework.

### 3. Methods of Teaching:

Interaction lectures, presented slide show lectures and assignments.

### 4. Assessment Method:

Reports, activities and workshops.

### 5. Recommended Text Books and References:

A. Textbook: Beginning ASP.NET 4: in C# and VB, by Imar Spaanjaars

#### B. Other References:

- 1) Murach's ASP.NET 4.6 Web Programming with C# 2015, 6th Edition, by Anne Boehm, Mary Delamater.
- 2) Professional ASP.NET 4.5 in C# and VB, by Christian Wenz, Jason N. Gaylord, Pranav Rastogi, Scott Hanselman, Todd Miranda.

### 3) Lecture Schedule:

| Weeks   | Topics  |
|---------|---|
| Week 1  | <b>Introduction: Asp.Net Overview</b>   |
| Week 2  | <b>ASP.NET Configurations</b>   |
| Week 3  | <b>ASP.NET State Management 1:</b><br>ASP.NET View State<br>ASP.NET Session State               |
| Week 4  | <b>ASP.NET State Management 2:</b><br>ASP.NET Cookies<br>ASP.NET Caching                        |
| Week 5  | <b>ASP.NET Web Controls 1:</b><br>Label Control<br>Button Control<br>Textbox Control            |
| Week 6  | <b>ASP.NET Web Controls 2:</b><br>DropDownList Control<br>Listbox Control                       |
| Week 7  | <b>ASP.NET Web Controls 3:</b><br>Checkbox Control<br>RadioButton Control<br>LinkButton Control |
| Week 8  | <b>ASP.NET Web Controls 4:</b><br>Image Control<br>Calander Control<br>Treeview Control         |
| Week 9  | <b>Midterm Exam</b>   |
| Week 10 | <b>ASP.NET Statements 1:</b>  |

|         |  |
|---------|--|
|         | <p>if else statements</p> <p>switch case</p> <p>ASP.NET Exceptions</p>             |
| Week 11 | <p>ASP.NET Statements 2:</p> <p>for loop</p> <p>foreach loop</p> <p>while loop</p> |
| Week 12 | <p>ASP.NET Collection 1:</p> <p>ASP.NET ArrayList</p> <p>ASP.NET HashTable</p>     |
| Week 13 | <p>ASP.NET Collection 2:</p> <p>ASP.NET Stack</p> <p>ASP.NET Queue</p>             |
| Week 14 | <p>ASP.NET Collection 3:</p> <p>ASP.NET Array</p> <p>ASP.NET List</p>              |
| Week 15 | <p>Application Project</p>   |
|         | <p>Final Exam</p>  |

### Course Description Form

Course Title: Operating System

Course Code:

Semester: I

Level: B.Sc.

Class: Fourth Class

Academic Year: 2022/2021

Course Instructor: Dr. Omar Munthir Al Okashi

Academic status: Lecturer

Place of work: Computer Networks System Department

Credit Hours: 4

Instructor Office Hours: Sunday: 12:30 - 01: 30, Tuesday: 10:30 - 12

E-mail (Official): omar.alokashi@uoanabr.edu.iq

Mobile Number: 07803387690

## Lecture Schedule:

| Weeks   | Topics  |
|---------|---|
| Week 1  | Introduction and main concepts of Operating Systems |
| Week 2  | OS operations and Functions                         |
| Week 3  | OS Structures                                       |
| Week 4  | Process Management 1                                |
| Week 5  | First Month Exam                                    |
| Week 6  | Process Management : Threads                        |
| Week 7  | Process Management: Synchronization                 |
| Week 8  | Process Management: CPU Scheduling                  |
|         | <b>Midterm Exam</b>                                 |
| Week 9  | Process Management: Deadlocks                       |
| Week 10 | Memory Management                                   |
| Week 11 | <b>Second Month Exam</b>                            |
| Week 12 | Memory Management: Segmentation                     |
| Week 13 | Memory Management: Paging                           |
| Week 14 | Memory Management: Virtual Memory                   |
| Week 15 | <b>File System</b>                                  |

# Course Weekly Outline

**Course Name:** Research methodology

|                           |  |            |         |         |            |

## Module Aims, Learning Outcomes and Indicative Contents

### أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية

|  |   |
|--|---|
| <p><b>Module Aims</b><br/>أهداف المادة الدراسية</p>                      | <ol style="list-style-type: none"> <li>1. Understand Network Switching: The aim of this module is to provide students with a comprehensive understanding of network switching technologies, including the operation, configuration, and management of network switches.</li> <li>2. Explore Routing Concepts: This module aims to introduce students to the fundamental concepts of network routing, including different routing protocols, routing algorithms, and the principles of efficient packet forwarding.</li> <li>3. Develop Routing Skills: The module aims to develop practical skills in configuring and managing routing protocols, including static routing, dynamic routing protocols such as RIP, OSPF, and BGP, and the implementation of routing policies.</li> <li>4. Study Network Switching Technologies: This module aims to explore various network switching technologies, including Ethernet, VLANs, Spanning Tree Protocol (STP), and Virtual Local Area Networks (VLANs), and their role in building scalable and resilient networks.</li> <li>5. Analyze Network Performance: The aim of this module is to enable students to analyze and evaluate the performance of network switches and routers, including factors such as latency, throughput, packet loss, and quality of service (QoS).</li> <li>6. Understand Network Security Considerations: This module aims to highlight the importance of network security in the context of switching and routing, including techniques for securing network devices, preventing unauthorized access, and mitigating common network attacks.</li> </ol> |
| <p><b>Module Learning Outcomes</b><br/>مخرجات التعلم للمادة الدراسية</p> | <ol style="list-style-type: none"> <li>1. Understand Network Switching: Students will be able to demonstrate a comprehensive understanding of network switching technologies, including the operation, configuration, and management of network switches.</li> <li>2. Apply Routing Concepts: Students will be able to apply fundamental concepts of network routing, including different routing protocols, routing algorithms, and the principles of efficient packet forwarding.</li> <li>3. Configure and Manage Routing Protocols: Students will gain practical skills in configuring and managing routing protocols, including static routing, dynamic routing protocols such as RIP, OSPF, and BGP, and the implementation of routing policies.</li> </ol>   |

|   |   |
|---|---|
|   | <ol style="list-style-type: none"> <li>4. Analyze Network Switching Technologies: Students will be able to analyze various network switching technologies, including Ethernet, VLANs, Spanning Tree Protocol (STP), and Virtual Local Area Networks (VLANs), and understand their role in building scalable and resilient networks.</li> <li>5. Evaluate Network Performance: Students will be able to evaluate the performance of network switches and routers, including factors such as latency, throughput, packet loss, and quality of service (QoS).</li> <li>6. Implement Network Security Measures: Students will understand the importance of network security in the context of switching and routing and be able to implement techniques for securing network devices, preventing unauthorized access, and mitigating common network attacks.</li> </ol>   |
| <p><b>Indicative Contents</b><br/>المحتويات الإرشادية</p> | <ol style="list-style-type: none"> <li>1. Introduction to Network Switching and Routing: <ul style="list-style-type: none"> <li>• Overview of network switching and routing concepts</li> <li>• Network topologies and architectures</li> <li>• OSI and TCP/IP network models</li> </ul> </li> <li>2. Network Switching Technologies: <ul style="list-style-type: none"> <li>• Ethernet fundamentals and switching operation</li> <li>• Virtual LANs (VLANs) and VLAN trunking</li> <li>• Spanning Tree Protocol (STP) and Rapid Spanning Tree Protocol (RSTP)</li> <li>• Inter-VLAN routing and Layer 3 switching</li> </ul> </li> <li>3. Routing Concepts: <ul style="list-style-type: none"> <li>• Routing fundamentals and packet forwarding</li> <li>• Routing tables and routing protocols</li> <li>• Distance Vector Routing Protocols (e.g., RIP)</li> <li>• Link-State Routing Protocols (e.g., OSPF)</li> <li>• Border Gateway Protocol (BGP) and external routing</li> </ul> </li> <li>4. Routing Protocol Configuration and Management: <ul style="list-style-type: none"> <li>• Configuring and managing static routing</li> <li>• Configuring and managing dynamic routing protocols</li> <li>• Route redistribution and route filtering</li> <li>• Routing protocol convergence and troubleshooting</li> </ul> </li> <li>5. Advanced Routing Concepts: <ul style="list-style-type: none"> <li>• Multicast routing and multicast protocols</li> <li>• IPv6 addressing and routing</li> <li>• Traffic engineering and Quality of Service (QoS)</li> <li>• Virtual Private Networks (VPNs) and tunneling protocols</li> </ul> </li> <li>6. Network Switching and Routing Security:</li> </ol> |

|                         | Final Exam   | 3 hr | 50% (50)         | 16 | All      |
| Total assessment        |              |      | 100% (100 Marks) |    |          |

### Delivery Plan (Weekly Syllabus)

#### المنهاج الاسبوعي النظري

|                | Material Covered   |
|----------------|--|
| <b>Week 1</b>  | Principles I: Benefits of Switching in Networks, Drawbacks of Switching in Networks, Benefits of Routing in Networks, Drawbacks of Routing in Networks, The Differences Between Switching and Routing in networks. |
| <b>Week 2</b>  | Principles II: Why we use switching and routing, The internal structure of Switching, The internal structure of Routing, The work of Switching and Routing.  |
| <b>Week 3</b>  | Routing and Switching Strategies- Switching: Forwarding and Filtering Traffic.   |
| <b>Week 4</b>  | Routing and Switching Strategies- Forwarding Based on MAC Addresses.   |
| <b>Week 5</b>  | Routing: Finding Paths, Routing Devices, Static Routes, Default Routes, Dynamic Routes.  |
| <b>Week 6</b>  | Routing Protocols I: Single versus multipath, Interior versus exterior.  |
| <b>Week 7</b>  | Routing Protocols II: Flat versus hierarchical, Link state versus distance vector.   |
| <b>Week 8</b>  | Choosing or Installing a Route, Prefix length, Administrative distance Metric.   |
| <b>Week 9</b>  | Spanning Tree and Rapid Spanning Tree, the structure of spanning tree, Why Are Loops Bad? The Comparison Algorithm.  |
| <b>Week 10</b> | Spanning Tree and Rapid Spanning Tree, Spanning Tree Addressing, Port States, Spanning Tree Timers   |
| <b>Week 11</b> | Spanning Tree Messages, Problems with Spanning Tree, Switch to Switch: A Special Case.   |
| <b>Week 12</b> | VLANs and Spanning Tree, The Rapid Spanning Tree Protocol.   |
| <b>Week 13</b> | VLANs and Trunking: Big Broadcast Domains, What Is a VLAN? The Effect of VLANs   |
| <b>Week 14</b> | Types of VLANs, VLANs Between Switches.  |
| <b>Week 15</b> | What is a Trunk?, Trunking Protocol Standards Pruning, VLAN Design Consideration.  |
| <b>Week 16</b> | Final Exam   |

### Delivery Plan (Weekly Lab. Syllabus)

#### المنهاج الاسبوعي للمختبر

|  | Material Covered |
|--|------------------|
|--|------------------|

|        |   |
|--------|---|
| Week 1 | Introduction to Packet Tracer                               |
| Week 2 | Switching in Packet Tracer                                  |
| Week 3 | Routing in Packet Tracer                                    |
| Week 4 | Network Address Translation (NAT) in Packet Tracer          |
| Week 5 | Quality of Service (QoS) in Packet Tracer                   |
| Week 6 | Wide Area Networks (WANs) in Packet Tracer                  |
| Week 7 | Dynamic Host Configuration Protocol (DHCP) in Packet Tracer |

### Learning and Teaching Resources

مصادر التعلم والتدريس

|                   | Text  | Available in the Library? |
|-------------------|---|---------------------------|
| Required Texts    | Bruse Hartpence, Packet guide to Routing and Switching, O'Reilly Media, Inc., 2012.<br>Cisco Networking Academy, Routing and Switching Essentials Companion Guide. Pearson Education, 2014. |                           |
| Recommended Texts |   |                           |
| Websites          |   |                           |

### Grading Scheme

مخطط الدرجات

| Group                       | Grade            | التقدير             | Marks (%) | Definition                            |
|-----------------------------|------------------|---------------------|-----------|---------------------------------------|
| Success Group<br>(50 - 100) | A - Excellent    | امتياز              | 90 - 100  | Outstanding Performance               |
|                             | B - Very Good    | جيد جدا             | 80 - 89   | Above average with some errors        |
|                             | C - Good         | جيد                 | 70 - 79   | Sound work with notable errors        |
|                             | D - Satisfactory | متوسط               | 60 - 69   | Fair but with major shortcomings      |
|                             | E - Sufficient   | مقبول               | 50 - 59   | Work meets minimum criteria           |
| Fail Group                  | FX – Fail        | راسب (قيد المعالجة) | (45-49)   | More work required but credit awarded |

|          |          |      |        |                                      |
|----------|----------|------|--------|--------------------------------------|
| (0 – 49) | F – Fail | راسب | (0-44) | Considerable amount of work required |
|          |          |      |        |                                      |

**Note:** Marks Decimal places above or below 0.5 will be rounded to the higher or lower full mark (for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The University has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker(s) will be the automatic rounding outlined above.

## Department of Computer Networks Systems

### Course Description Form

Course Title: Network Security

Course Code:

Semester: II

Level: B.Sc.

Class: 4<sup>th</sup>

Academic Year: 2022/2021

Course Instructor: Dr. Sufyan T. Faraj Al-Janabi

Academic status: Professor

Place of work: CCS&IT, University of Anbar

Credit Hours: 2

Instructor Office Hours: Sunday & Wednesday [10 am-1pm]

E-mail (Official): [sufyan.aljanabi@uoanbar.edu.iq](mailto:sufyan.aljanabi@uoanbar.edu.iq)

Mobile Number: 07808655508

## 1. Lecture Schedule:

| Weeks               | Topics   |
|---------------------|--|
| Week 1              | Introduction to Network Security                           |
| Week 2              | Public-Key Cryptography and PKI                            |
| Week 3              | RSA  |
| Week 4              | Access Control I: Authentication                           |
| Week 5              | Dictionary Attacks   |
| Week 6              | Access Control II: Authorization                           |
| Week 7              | CAPTCHA  |
| Week 8              | Malware: Viruses and Worms                                 |
| <b>Midterm Exam</b> |  |
| Week 9              | Stream Ciphers   |
| Week 10             | The RC4 Cipher   |
| Week 11             | Arithmetic in $GF(2)$ and $GF(2^n)$                        |
| Week 12             | The Advanced Encryption Standard                           |
| Week 13             | Public-Key Cryptography for Exchanging Secret Session Keys |
| Week 14             | Hashing for Message Authentication                         |
| Week 15             | Web Security   |

# Course Weekly Outline

**Course Name: Artificial Intelligence II**

## Department of Computer Networks Systems

### Course Description Form

**Course Title: Web Application Development II**

**Course Code:**

**Semester: II**

**Level: B.Sc.**

**Class: 4<sup>th</sup>**

**Academic Year: 2022/2021**

**Course Instructor: Prof. Dr. Ali Makki Sagheer**

**Academic status: Professor**

**Place of work: College of Computer Science and Information Technology**

**Credit Hours: 3 hours**

**Instructor Office Hours: 3 hours**

**E-mail (Official): ali\_makki@uoanbar.edu.iq**

**Mobile Number: +964(0)7700073940**

## Objectives:

### 1. Course Description:

2. ADO.NET allows you to implement data access in ASP.NET applications. The two key components of ADO.NET are Data Providers and DataSet . The Data Provider classes are meant to work with different kinds of data sources. They are used to perform all data-management operations on specific databases. DataSet provides a disconnected representation of result sets from the Data Source, and it is completely independent from the Data Source. From the following chapters you can learn some important database programming in ASP.NET applications.

### 3. Methods of Teaching:

Interaction lectures, presented slide show lectures and assignments.

### 4. Assessment Method:

Reports, activities and workshops.

### 5. Recommended Text Books and References:

A. Textbook: Beginning ASP.NET 4: in C# and VB, by Imar Spaanjaars

#### B. Other References:

- 1) Murach's ASP.NET 4.6 Web Programming with C# 2015, 6th Edition, by Anne Boehm, Mary Delamater.
- 2) Professional ASP.NET 4.5 in C# and VB, by Christian Wenz, Jason N. Gaylord, Pranav Rastogi, Scott Hanselman, Todd Miranda.

### 3) Lecture Schedule:

| Weeks  | Topics   |
|--------|--|
| Week 1 | <b>Introduction</b>  |
| Week 2 | <b>ASP.NET Data Access 1:</b><br><b>ADO.NET Architecture</b><br><b>Advantages of ADO.Net</b>   |
| Week 3 | <b>ASP.NET Data Access 2:</b><br><b>Disconnected Data Access Architecture</b><br><b>ASP.NET Connection String</b><br><b>First ASP.NET Database Program</b>                 |
| Week 4 | <b>ASP.NET Data Providers 1:</b><br><b>ASP.NET Connection</b><br><b>ASP.NET Sql Server Connection</b><br><b>ASP.NET OLEDB Connection</b><br><b>ASP.NET ODBC Connection</b> |
| Week 5 | <b>ASP.NET Data Providers 2:</b><br><b>ASP.NET Command</b><br><b>ASP.NET ExecuteNonQuery</b><br><b>ASP.NET ExecuteScalar</b><br><b>ASP.NET ExecuteReader</b>               |
| Week 6 | <b>ASP.NET Data Providers 2:</b><br><b>ASP.NET DataReader</b><br><b>ASP.NET DataAdapter</b>  |

| <b>ASP.NET DataAdapter Commands</b> |  |
|-------------------------------------|--|
| <b>Week 7</b>                       | <b>Midterm Exam</b>  |
| <b>Week 8</b>                       | <b>ASP.NET Dataset</b>   |
| <b>Week 9</b>                       | <b>ASP.NET Dataset 1:<br/>How to Asp.Net Dataset<br/>Find Tables in a Dataset</b>  |
| <b>Week 10</b>                      | <b>ASP.NET Dataset 2:<br/>ASP.NET Dataset row count<br/>How to Asp.Net Dynamic Dataset<br/>Dataset Column Definition</b> |
| <b>Week 11</b>                      | <b>ASP.NET Database Programming</b>  |
| <b>Week 12</b>                      | <b>ASP.NET Database Programming 1:<br/>ASP.NET DBNull Value<br/>ASP.NET single quotes</b>                                |
| <b>Week 13</b>                      | <b>ASP.NET Database Programming 2:<br/>ASP.NET Stored Procedures<br/>ASP.NET Procedure with Parameter</b>                |
| <b>Week 14</b>                      | <b>ASP.NET Database Programming 3:<br/>Range of records from database<br/>ASP.NET Image to Database</b>                  |
| <b>Week 15</b>                      | <b>Application Project</b>   |
|                                     | <b>Final Exam</b>  |

## Department of Computer Networks Systems

### Course Description Form

Course Title: mobile computing

Course Code:

Semester: I

Level: B.Sc.

Class: 4th

Academic Year: 2022/2021

Course Instructor: Mr. Akeel Shaker mahmoud

Academic status: Teacher

Place of work: Computer center

Credit Hours:

Instructor Office Hours:

E-mail (Official): akeelab2000@uoanbar.edu.iq

Mobile Number: 07817149490

## Lecture Schedule:

| Weeks   | Topics  |
|---------|---|
| Week 1  | What is Mobile Computing.<br>elements of mobile computing.  |
| Week 2  | Making communications wireless.<br>duplexing techniques   |
| Week 3  | multiple access techniques<br>Frequency division multiple access (FDMA)<br>Time division multiple access (TDMA) |
| Week 4  | GSM (Global System for Mobile<br>Telecommunications)(2G)  |
| Week 5  | UMTS (Universal Mobile Telecommunications Systems)(3G)  |
| Week 6  | First Exam  |
| Week 7  | Universal Subscriber Identity Module, USIM:   |
| Week 8  | Radio Network Subsystem (RNS)<br>UMTS radio access network, UTRAN   |
|         | <b>Midterm Exam</b>   |
| Week 9  | What is Radio Network Controller RNC  |
| Week 10 | What are the interfaces   |
| Week 11 | core network (CN)   |
| Week 12 | Protocol Stack  |
| Week 13 | Long-Term Evolution (LTE)(4G)   |
| Week 14 | Second Exam   |
| Week 15 | Final Exam  |

نموذج وصف المقرر

مراجعة أداء مؤسسات التعليم العالي ((مراجعة البرنامج الأكاديمي))

يوفر وصف المقرر هذا إيجازاً مقتضياً لأهم خصائص المقرر ومخرجات التعلم المتوقعة من الطالب تحقيقها  
مبرهناتاً عما إذا كان قد حقق الاستفادة القصوى من فرص التعلم المتاحة. ولابد من الربط بينها  
وبين وصف  
البرنامج.
