Authentication of the Dean

1. **Program vision**

· Leadership in education and scientific research to achieve creativity and knowledge integration in administrative sciences through openness and communication with specialized academic institutions and community organizations

2. Program message

. Excellence in providing quality specialized scientific knowledge service in the administrative fields and emphasizing the aspects of learning, education and scientific research, by graduating intellectually and behaviorally qualified human cadres, and actively contributing with theoretical and applied studies to support the aspirations of community institutions in achieving their goals and supporting the national vision in reform, development and administrative development

3. Program objectives

 Cognitive and behavioral preparation for scientific cadres specialized in administrative sciences to support various institutions to carry out their roles in a professional manner
 Scientific and cognitive communication and interaction with academic institutions and relevant organizations, in order to maintain the scientific and academic level in the field of specialization.
 Establishing various training and development courses and programs and improving the level of administrative performance in its various aspects and raising it to excellence.

4. Conducting theoretical and applied research and studies to develop the field of knowledge to which it belongs, as well as making the field of this research institutions and organizations of different types and the nature of their work and activities with the aim of developing, enriching and developing the intellectual and field side of this science and identifying the problems of these institutions

5. Spreading the contents, behaviors and practices of the values of good administration and good governance, as well as diagnosing and combating administrative corruption in order to create leadership, creativity and a spirit of belonging to institutions of all types

4. Programmatic accreditation

Nothing

5. Other external influences

Using computers and data

Use educational posters

Giving exercises and examples related to the subject as homework

3	Quality management	The fourth stage
3	Corporate Governance	The fourth stage
2	Investment portfolio	The fourth stage
2	Negotiation management	The fourth stage
2	Graduation research project	The fourth stage

8. Expected learning outcomes of the	program
Knowledge	
	1. To know the concepts of individual
	differences.
	2. To learn about the modern
	development of the science of financial
	management.
	3. To understand how financial
	management affects institutions and
	companies.
	4. To be able to clearly understand
	financial management in order to
	complete the course vocabulary
	5. Explain the role and importance of
	financial management for financial
	institutions

Skills	
Skills	1. Self-skills by involving the student in
	the lecture.
	2. Interactive skills on the best way to
	solve financial management exercises
	by opening a group dialogue among
	students and introducing them to the
	most appropriate method.
	3. Application of analysis and review by
	students.
	4. Self-evaluation processes for
	students.
	students.
Value	
Value	Using thinking and contemplation to
	understand financial management in the
	correct manner
Ideas	1. Developing the student's ability to
	deal with numbers and data and how to
	analyze and use them.
	2. Developing the student's ability to
	deal with multiple media.
	3. Developing the student's ability to
	dialogue, discuss and analyze.
0 Teaching and les	
9. Teaching and lea	
	interaction and analysis.
 Feedback method. Method of giving, rece 	aiving and interacting
	to some individual group activities and duties.

- 4. Assigning the student to some individual group activities and duties.5. Allocating a percentage of the grade to daily assignments and tests.

Evaluation methods 10.

- Active participation in the classroom is evidence of the student's commitment and responsibility. 1.
- Commitment to the specified deadline for submitting assignments and research.
- Commitment to the specified deadline for submitting assignments and research.
 Daily, semester, and final tests are prepared for commitment and cognitive and skill achievement.
- Through participation and questions related to and outside the topic. Directed to students. 4.

Orienting new	v faculty mem	bers				

Direct supervision and follow-up by the department on the progress of the teaching process

towards the scientific aspects

Professional development for faculty members

1. Holding workshops and seminars inside and outside the college to spread knowledge

2. Establishing programs to develop solid scientific publishing skills for the faculty

3. Openness with government academic institutions

4- Periodic follow-up by the department administration of the scientific and administrative

aspects of faculty members

12. Acceptance criterion

The standard used is the student (average) But it is preferable to take into account (the student's desire) to choose, even if this is impossible in choosing the college, but at least that is taken when choosing between departments because it is a very important matter on which the future of the entire student depends.

13. The most important sources of information about the program

1. Introduction to financial management.

2. The structure of the financial department and the details of carrying out its tasks.

14. Program development plan

Trying to link study topics to the actual work reality by activating the skills of using objective thinking and analysis, and working to increase awareness of the e-learning process and enhance self-confidence, in addition to increasing computer culture and knowledge.

Name: Mrwan Thakir Abed					
Email: <u>Marwan.thakir@uoanbar.ec</u>	<u>lu.iq</u>				
68. Course Objectives					
Course Objectives	 Understanding the concept of intellectual capital: Explaining what intellectual capital is, its types, its importance in the modern economy, and how to transform ideas into financial value. Studying intellectual capital management strategies: Introducing students to the tools and techniques for managing, protecting and marketing intellectual property. 				

		 3. Enhancing innovation and creativity skills: Encouraging students to develop their abilities in innovation and creativity by using intellectual assets to develop new products or improve existing processes. 4. Understanding the economic and social impact of intellectual capital: Analyzing how intellectual capital affects the economic performance of companies and societies and its role in promoting sustainable development. 5. Developing research and analysis skills: Encouraging students to conduct research and analysis related to intellectual capital topics and provide effective reports and presentations on them. 6. Achieving these goals helps students understand the importance of intellectual capital in the contemporary economy and apply the concepts and skills acquired in a variety of practical fields. The study of marketing research that aims to prepare and train the student includes collecting the necessary information - to determine the goals of the organization so that the latter plays a very influential role. The student's knowledge of concentration, integration, and integratio between projects.
