Department of Qur'anic Sciences /

Scientific Guide

2020-2021

Visions:

The Department of Qur’anic Sciences, as part of the educational institution, seeks to assume its required academic position compared to other similar institutions in the local, regional and global environment. It aspires to be ahead of them, and then strives diligently to achieve the required academic progress and advancement.

the message:

The department aspires to deepen Islamic identity, consolidate the noble contents of the Qur’an in the souls of students, instill pride in the principles of the Islamic religion and its constitution represented by the Holy Qur’an, strengthen the spirit of religious and national belonging in their souls, and qualify specialists in teaching the sciences of the Qur’an to the scientific level that enables them to serve the Book of God, their homeland, their nation, and their true Islamic religion.

Tutorial objectives:

1_ Graduating male and female teachers who are scientifically, educationally and culturally qualified to teach the subject of Qur’anic sciences and Islamic education to all secondary schools.

2_ Building an academic environment characterized by creativity within the college and contributing to activating the student’s abilities as it is one of the axes of the educational process.

- 3_ Contributing to scientific research and linking it to human and development needs.**
- 4_ Contributing to activating the spirit of responsibility towards religion and the nation.**
- 5_ Developing scientific thinking, its methods, and innovative and creative skills among students.**
- 6_ Qualifying graduates from the department in primary and postgraduate studies to prepare solid research and studies that serve religion and society.**

Course description:

The courses described as follows:

- 1. Course code and number
- 2. Course title
- 3. The numbers assigned, for example, (4-3-1-3), indicate, in order, credit hours, study hours (1 hour = 1 credit hour), tutorial hours (1 credit hour = 0), and laboratory hours (3 hours = 1 hour Accredited).

Prerequisites, if any, are indicated in the course description. It was created to ensure an adequate and uniform background for students at advanced levels. Sometimes, students may feel that they already have the appropriate background for an advanced course due to previous training, transfer of stored information, or by examination.

Course coding system:

Course code (department requirement) (For example, a course in the Arabic Language Department ARL)

The course code consists of seven levels as follows: -

Three to four letters in the English language exclusively, which indicate the academic department symbol, followed by three numbers indicating the academic level and my agencies:

100-199: level one

:200-299Second Level

300-399: The third level

400-499: fourth level

500-599: level five

600-699: Sixth level

If the course is a college requirement, the three or four letters at the beginning of the course are the college code (for example, a course in the College of EngineeringEHS000).

If the course is a university requirement, the three or four letters at the beginning of the course are the university code (for example, a course in any collegeUOA000).

University course requirement

or

College course requirements

or

Department course requirements

Course Code QSC 103 Course title (Hadith Sciences) Number of study units (3)
Lecture hours (3 hours per week) Practical hours (1 hour per week) Laboratory
hours (000)

- Definition of the course: knowledge of the terminological rules of hadith and its sciences.

- Vocabulary of the course curriculum: codification of the Prophet's Sunnah, definition of hadith and what is related to it, common rules between hadith in terms of the abundance and scarcity of paths, and in terms of acceptance and refutation.

Course Description: Science of Hadith and what is related to doctrinal issues, as well as the rules and principles of jurisprudence and what is also related to the science of behavior.

Course learning outcomes

A- Knowledge And understanding

B-Skills Private With the topic

- Methods education And learning:

1.Lectures

2.Leaves a job

3.studies on Internet

4.Visits Scientific

Methods Evaluation:

- the exam Half

- Activity

- the exam Practical

- the exam Oral

- the exam Final

C-skills Thinking

- **Ability on Preservation And remember**
- **Ability on Identify on Hadith sciences**
- **Ability on Identify on Flags Prophetic hadith**
- **Ability on Share Collective For contents Literary For the material**
- **The ability on Interaction with Sources And references**

Dr-Skills the public And movable(Skills The other Related Capable recruitment And evolution Personal):

- **Capability on Calendar Linguist For the material**
- **Ability on education And explain Concepts Related With the material**
- **The student should distinguish between judging a hadith and its terminology and the rulings on which it is based. Thus, the student will be able to know the legal ruling through judging the hadith.**

- Recommended textbooks:

- 1. Knowledge of Hadith Sciences by Al-Khatib Al-Baghdadi**
- 2. Knowledge of Hadith Sciences by Al-Hakim Al-Naysaburi**
- 3. Hadith sciences and its terminology by Al-Qasimi**

- Introductions to the course: The persistent motivation by Sheikh Ahmed Shaker, Facilitating the term Hadith by Sheikh Mahmoud Al-Tahan.

- Laboratory vocabulary:

Outputs Learning For the decision
