Abstract –

Rich Site Summary (RSS) is a design for handing regularly changing web content, which is utilized to publish activities that are regularly updated in a unified format. Several news sites, blogs and other online publishers publish their component as an RSS feed for beneficiaries. RSS solves all people problems for who regularly used the web. It permits the user to simply stay informed by recovering the latest sites content that gets the users interested. Users are time-saving by simply un visiting each site separately. This paper presented a suggested medical and healthcare RSS uses cloud computing.
